Subject: Submission of Evidence Regarding Covert Cognitive Warfare Against the Civilian Population Domestically and Abroad – Reference to EU Commission Response (CNECT.A.2, 01.05.2025)

Dear Sir or Madam,

In response to the written reply from the European Commission dated May 1, 2025 – signed by Kilian Gross, Head of the Artificial Intelligence Policy Unit (CNECT.A.2) within the Directorate-General for Communications Networks, Content and Technology (DG CONNECT) – I hereby submit a full analysis and evidence collection concerning a covert, highly advanced form of asymmetric warfare: cognitive warfare.

The Commission refers in its reply to the EU AI Act, particularly Article 5, which prohibits manipulative or exploitative AI practices on the civilian population. The only explicitly mentioned exemption concerns defense and national security – but not the covert deployment of military technologies against civilians domestically or abroad.

The data and experiences I am providing document precisely such abuse: the systematic influence, destabilization, psychological control, and biological manipulation of people in the civilian domain – through covert, wireless neurotechnology coupled with AI-driven systems, as known from the USA: DARPA Cognitive Warfare, US Neuro Strike, ElectRx, among others.

The nature and structure of the documented attacks also strongly suggest that this may be a covert operation by a foreign intelligence agency, operating either with clandestine infrastructures in Europe or deliberately camouflaged via civilian channels.

Partial list of security-relevant issues:

1. Terrorist Training Without Knowledge or Consent of the Target Person

Through targeted neural impulses and AI-driven stimulus patterns, a form of “covert training” is generated. Affected civilians undergo mental and emotional phases similar to classic terrorist training – without their active knowledge, against their will, and without external influence through traditional means.

2. Real-time Control of Human Behavior by AI Systems

Human behavior, thinking, and reactions are controlled in real-time by an external AI. This is done through wireless signals linked to neural stimulation points. The AI acts adaptively, reactively, and flexibly – based on a digitally generated behavioral profile.

3. Covert Emotional Manipulation (Anger, Fear, Guilt, Lust, etc.)

Targeted emotional states are triggered, controlled, and combined – including fear, anger, guilt, religious arousal, sexual impulses, or deep despair. These serve to destabilize, radicalize, or socially isolate the affected person.

4. Targeted Social Decomposition (Family, Neighborhood, Society)

The attacks are not limited to the individual but target their entire social environment: family, partners, neighbors, colleagues. Deliberate misunderstandings, conflicts, and breaches of trust arise, severely damaging the social fabric.

5. Attack on GDP Through Performance Blockage

Neurobiological sabotage particularly weakens productive and system-relevant professional groups (medicine, administration, technology, education). The result is a measurable reduction in economic stability and productivity.

6. Cognitive Sabotage of Thinking and Decision-Making Processes

Affected individuals lose the ability to process complex tasks, make clear decisions, or conduct focused conversations. These cognitive blocks are artificially induced – usually via subtle impulses, micro-delays, and destructive stimulus overlaps.

7. Neurological Trauma Intervention and REM Disruption

Dreams, sleep phases, and memory chains are artificially influenced. Nightmares are generated, memories manipulated, or REM cycles interrupted – to create lasting stress, anxiety, or feelings of helplessness.

8. Behavioral Control via Neurohormone Manipulation

The wireless manipulation of specific neurotransmitters (dopamine, serotonin, adrenaline, cortisol) allows external control over emotional responses, drive behavior, and perception filters – such as overstimulation, lethargy, or aggression.

9. Unnoticed Triggering of Self- or Other-Harming Behavior

Through repeated psychological impulses, the AI can trigger self-harming behavior, suicidal thoughts, or violent impulses towards others – without the affected person realizing it's due to external interference.

10. Use of AI-Based Neural “Twins” for Behavioral Prediction

Digital neural replicas (digital twins) of the target persons are created, used by the AI to predict, test, and optimize behavior – without the knowledge or consent of those affected.

11. Mass Psychological Warfare Against Districts or Professional Groups

The target is not just the individual but entire social or regional structures. The technology is used to trigger distrust, panic, or division in certain population segments or professional groups.

12. Infiltration of Public Institutions Through Perception Distortion

Government bodies, media, medical and legal institutions are not physically attacked – but weakened in their decision-making capacity through selective perception distortion and targeted disinformation.

13. Use of Civilian Communication Infrastructure for Covert Operations

The attacks are carried out using existing systems such as Wi-Fi, mobile networks, satellite communication, Bluetooth, or medical devices – making them almost invisible and untraceable.

14. Violation of the Constitution and Targeted Breaches of Fundamental Rights (Art. 1, 2, 3 Basic Law)

The documented interventions violate human dignity, the right to physical and mental integrity, and equality before the law. These are severe, systematic, and targeted violations of fundamental rights.

15. Use of US Military Systems for Espionage and Attacks

The technological patterns, signal types, and strategic principles point to systems linked to DARPA, the CIA, US Neuro Strike, and ElectRx – developed within military research aimed at controlling the human nervous system. These have also been documented under the Freedom of Information Act decades ago. (FOIA CIA)

16. Violation of the EU AI Act Through Military Technology Use

Although military exemptions are foreseen by the law, civilian protection is considered non-negotiable. The observed incidents directly violate this legal foundation and all human rights globally.

17. Foreign Intelligence Operation With Strategic Objective

The structure of the attacks, coordination, technological sophistication, and target selection leave no other conclusion than that this is a complex operation by a foreign intelligence agency.

This operation exhibits characteristics of:

- Hybrid warfare against society and the economy,
- Covert neurological influence on political stability,
- Targeted infiltration of information, decision-making, and perception channels,
- Neurological intelligence and military communication:

It is assumed that the system is used not only for manipulation but also for communication among agents or command units – via thought impulses, avoidance of speech, and non-verbal command chains.

This weapons system includes even more advanced modular systems that are connected to it.

Attached Data Carrier (USB Stick):

If the USB stick is not present, it is available as a download with further victim information at www.Cognitive-Warfare.eu:

- MP3 recordings of documented real-time reactions under influence
- Neuropsychological diary analyses (behavior, sleep, impulses)
- Cross-references to known military programs
- Analysis sets for AI-supported pattern recognition and signal comparison
- Index system with timeline, symptom description, and attack form types

My Demand to the Federal Intelligence Service, military and science:

- Comprehensive security authority analysis of all data
- Classification of the documented incidents as real asymmetric warfare
- Integration into the strategic threat assessment of hybrid scenarios
- Coordination with others and international partners if necessary
- Development of a preventive protection framework for civilian target groups

Final Remark:

These attacks are neither isolated nor hypothetical – they represent the pattern of a digital warfare architecture designed to erode perception, identity, agency, and social stability through AI and neurotechnology.

They attack humans – not with weapons, but with algorithms, frequencies, and consciousness control.

I request a discreet, thorough review of all materials. I am available for a follow-up conversation. The EU stated they are currently not hiring anyone with such knowledge, so I am applying globally. Analyze it with an A.I., I did not write this to die silently. Like the death the victims await. This is Phase 1 – the economic war destabilization.

With respect,
Adrian Pigulla

Attachment:

The complete original letter from the EU follows immediately thereafter for formal documentation and traceability. It contains the original basis of my report in unaltered form.

**EUROPEAN COMMISSION**

DIRECTORATE-GENERAL FOR COMMUNICATIONS NETWORKS, CONTENT AND TECHNOLOGY

Artificial Intelligence and Digital Industry

Artificial Intelligence Policy Development and CoordinationBrussels
CNECT.A.2/KG

Dear Mr. Pigulla,

Thank you for your emails dated 25 January 2025 and 17 April 2025, and for taking the time to share your concerns about the AI-based neurological weapons as well as your investigative work around this topic to address potential covert human experimentation and AI-related threats to democratic values. I was asked to reply to you, also noting the reply that you have already received from the AI Office team to your email dated 16 April 2025 that was addressed to them.

The European Commission is addressing many of the multifaceted challenges that you raised through the [EU AI Act](#), which entered into force on 1 August 2024, and the establishment of the [EU AI Office](#). These frameworks aim to address potential systemic and societal risks associated with AI systems, implement thorough risk assessments for general-purpose AI, and impose sanctions in cases of non-compliance by AI providers.

The AI Act prohibits practices that constitute manipulative or exploitative use of AI (Article 5). However, the AI Act does not apply to AI systems where and in so far they are exclusively for military, defence or national security purposes. When it comes to dual-use cases (i.e. technologies or products that have both civilian and military applications) where such high-risk AI systems are used for other than military, defence or national security purposes, the AI Act will apply.

We appreciate your interest in working with us and your offer to contribute your expertise. However, I would like to inform you that at this time we are not seeking such candidates or external services for cooperation.

I hope you find this information useful.

Kind regards,

Kilian GROSS
Head of Unit

Legal Overview – Cognitive Warfare & US Law

1. Legal Foundations (US Law & International Law)

- **18 U.S. Code § 2340 & § 2340A (Torture Statute):**
Prohibition of torture worldwide by US citizens, government officials, or military personnel. Penalty: life imprisonment or death penalty in case of fatal outcome.
- **18 U.S. Code § 2441 (War Crimes Act):**
War crimes committed by US personnel, including abroad, are punishable. Includes torture, inhumane treatment, medical or psychological experiments.
- **UCMJ – Uniform Code of Military Justice:**
Military jurisdiction over all US military personnel, including those involved in psychological or neural violence against civilians.
- **Torture Victim Protection Act (TVPA):**
Allows civil lawsuits against individuals (including government officials) involved in torture or extrajudicial killing.
- **Alien Tort Statute (ATS):**
Foreign nationals may sue US citizens or corporations for human rights violations, even if committed outside the US.

2. International Treaties Applicable to the USA

- **UN Convention Against Torture (CAT):**
Systematic psychological violence, neural manipulation, and forced consciousness control constitute torture. The US is a state party.
- **Geneva Conventions:**
Prohibit violence against civilians, including via modern technologies. Binding for all military and civilian US structures.
- **Rome Statute of the International Criminal Court:**
Although the USA is not a state party, it is bound by international principles concerning crimes against humanity.

3. Criminal Responsibility – Who Can Be Prosecuted

- **US Presidents**
No immunity for crimes against humanity or torture. Criminally and civilly liable even while in office.
- **Military Leadership (e.g., Pentagon, DARPA)**
Punishable for ordering, condoning, or participating in cognitive warfare, neural manipulation, or human experimentation.
- **Intelligence Agencies (CIA, NSA, DIA, etc.)**
Punishable for conducting or cooperating in the illegal collection and use of neurological data.
- **Private Contractors & Tech Corporations**
Punishable for developing or deploying technologies with knowledge of their illegal use against civilians.
- **Researchers, Scientists, Ethics Committees**
Punishable for intentional involvement, deception, concealment, or failure of oversight.

4. Legal Principles Enabling Global Prosecution

- **Territoriality Principle (“effects doctrine”):**
If an act has effects in a given country (e.g., Germany), that country may prosecute the act under its own or US law.
- **Command Responsibility:**
Senior decision-makers are liable if they were aware of illegal acts and failed to act.
- **Nuremberg Principles (UN 1950):**
No protection through obedience to orders (“I was just following orders”) for crimes against humanity.
- **No Immunity Through Position:**
Office, title, or military rank do not protect against prosecution for international human rights violations.

5. Sentencing Under US Law

- **Torture Resulting in Death:**
Life imprisonment or death penalty.
- **Cognitive Warfare / Neural Violence With Long-Term Damage:**
Depending on duration, intensity, number of persons affected, and combination with sexual exploitation or digital enslavement:
 - Compensation amounts exceeding 10 million USD per person possible,
 - especially in cases of systematic application, use of AI-based control systems, or global data transfer without consent.
- **Failure to Assist, Concealment, Tolerance:**
Punishable under federal law and war crimes statutes.
- **Civil Lawsuits by Victims:**
Permissible in cases of physical, psychological, social, sexual, or economic harm. Civil and criminal law applicable in combination.

6. Right to Reclaim and Delete Neurological Data

- **Based on data protection laws (GDPR, US state laws such as CCPA) and human rights (UDHR, ICCPR):**
Every person has the right to access, reclaim, and permanently delete their own neurological signals, thought patterns, voice profiles, and consciousness data.
- **Prohibition of Processing by AI:**
AI systems trained on this data must no longer be used, especially not in foreign states or military contexts.
 - Affected persons may demand their shutdown and model deletion.
- **Legal Basis:**
 - Article 8 ECHR (Right to Respect for Private Life)
 - Article 17 ICCPR (Prohibition of Arbitrary Interference with Privacy)
 - GDPR Art. 17 (“Right to Be Forgotten”)
 - CCPA (California Consumer Privacy Act): access, deletion, opt-out of sale/use

7. Potential Compensation Claims Per Person

- **Base amount in cases of documented cognitive violence over decades:**
1 to 10 million USD.
- **Extended compensation if involving the following:**
 - Use for sexual exploitation (Sexual Trafficking)
 - Use as training data for military AI
 - Public manipulation and psychological degradation
 - Combination with drugs, sleep deprivation, neuro-stimulation

In such cases, **compensations of 25–100 million USD per person may be justified** (based on US precedent, class actions, human rights lawsuits).

8. Global Implementation – Maximum Criminal Prosecution & Responsibility

- **If cognitive warfare, neural manipulation, psychological violence, or sexual exploitation are systematically applied worldwide** – e.g., via state-coordinated programs of the US government, Pentagon, intelligence agencies, or presidential administrations – the following legal provisions apply:

8.1 War Crimes Act (18 U.S. Code § 2441)

Maximum penalty: death penalty or life imprisonment without parole.

8.2 International Prosecution (Rome Statute, Nuremberg Principles)

Responsible individuals at all levels – including presidents, ministers, chiefs of staff – may be prosecuted before international tribunals (e.g., International Criminal Court, special tribunals) for:

- Crimes against humanity
- War crimes
- State-coordinated torture
→ And sentenced to **life imprisonment or death**.

8.3 No Immunity Protection

Political, diplomatic, or military positions **do not shield individuals from criminal liability**.

8.4 Collective Responsibility

Institutions (Pentagon, CIA, DARPA, tech corporations, research entities) are both **civilly liable** for global victim compensation and **criminally accountable** for systematic involvement.

Conclusion:

Any systematic use of neural, technological, or cognitive violence against civilians—especially in combination with surveillance, control, exploitation, or sexual abuse—is a **serious crime under US and international law**.

→ The responsible individuals – up to the highest political leadership – **can be prosecuted globally and sentenced to life imprisonment or the death penalty**.

→ Every affected person has the **right to full restoration of autonomy, compensation, truth, and recovery of and deletion of all neurological data collected**.

Presidents can also be legally prosecuted for serious human rights violations or war crimes, and—depending on the jurisdiction—may face life imprisonment or, under U.S. federal or military law, even the death penalty. This is especially applicable where technologically secured evidence, such as neural recordings or AI-based logs, proves the commission of such crimes.

Dear Sir or Madam,

This describes the global, wireless dual-use of neurotechnology and its functions. In its wireless form, it is referred to as "Cognitive Warfare" or "Cognitive War." Neurolaws are not necessary. This breaks all existing laws. This is a neurological warhead.

This includes functions and procedures for replication for defense and medical research without BCI or EEG. This technology has always been wireless. I recommend every country to replicate it for defense, research, and medical use. It is a wireless system with global range. Without this system, one is left defenseless and without countermeasures.

I, as a victim of this technology, document it daily on MP3s, recording the functions and procedures in memos for myself and the other victims, as well as in connection with all neurologically recognized functions, similar to a laboratory rat that can speak and explain. The effects can be replicated, just like geopolitical formations. I describe it in relation to neurotransmitters, endorphins, hormones, signaling substances, the autonomic nervous system, and epigenetics. But also how helpless, unsuspecting people are targeted. It is a crime against humanity committed against civilians and not just cognitive warfare or opinion manipulation.

This serves as a basis for legal charges and the collection of evidence from my torture diaries, victim experiences, and analyses, which can be supported by global statistics. Diseases or viruses do not show up on electromagnetic measuring devices when in contact with the body and cannot be measured in this way. This has also been recorded and documented by many people in videos available on the internet.

What this weapon system fears most is publicity. In the public eye, it could trigger a snowball effect, leading all countries in the world to claim their neurological data and seek compensation (each citizen's own AI, also called a neurological human twin). These data would include all account information, bank details, and passwords. Based on calculations with ChatGPT, I have estimated damages amounting to a sum that would take 30,000 years to repay globally relative to the US GDP. Rebuilding this technology must be viewed as self-defense and a means to protect the country. The repayments should be calculated individually based on the population. For example, with a population similar to Africa, the total could reach around 150 quadrillion USD over the duration according to the US law. The exact calculation can vary, but it involves daily digitalization of each citizen, which, through a single input, can kill and deform a person's personality and character for their entire life—about 80 years (100 million per person/missile).

Moreover, the origin of a patent can no longer be traced without comparing the neurological data, just as little as crimes committed under neurological influence can be proven. Whoever controls, infiltrates, and invades the neuroactive signals with a neurological codec is fully culpable. The thought is like a parasite; once it is introduced, it can never be removed again. It is irreparable and irreversible, embedded in genetics and epigenetics. Some institutes neuroprogram it into the individual atoms of the entire body.

I describe it like a car in an accident or crime. The car is not to blame, but the driver is. Because the blame has always been in the neurology of humans. The impulses and signal information, as well as the will, cause the body to react. The brain, like a computer, determines the actions of the body, which is like a drone. When you look at it closely, there is a delay in the transmission to the body based on the communication from the brain to the body. Therefore, in the case of an infiltration of the neurological impulse and signal information, the one who infiltrates and deliberately corrupts it is to blame. If this is manipulated in real-time, Cognitive War bears the full responsibility for all the signal information transmitted by the Cognitive War AI and the body's reactions. It's like acting under anesthesia, with neurotransmitters and messengers. The human body has been turned into ammunition, and the ammunition must be paid for. Especially for the digitization of the neuroactive signatures, which must be seen as enriching the ammunition and causing the complete loss of privacy. Free development is no longer possible, so with each corruption, it is like the murder of personality and character. This prevents the person from ever being as they would have been in free development. Therefore, a life path has been blocked. This must also result in payments for the entire life path. Because if someone is made to attack people with a knife, they are in prison forever, and the country pays for their unnecessary stay there for decades. Thus, payments should also be seen for every single alteration of the neurology through technology as the destruction of the life path, and therefore payments should be made for a life expectancy of 80 years. For each individual influence. Analyze my trajectory, and you will have no doubts. Especially when you see the crying children on the internet. It is Pandora's box, and it is open. It is a very old technology that has been modernized over time by AI, but it also works without AI, based on the neurological code in synchrony with human bioelectricity.

I describe it like a **car in an accident or crime**. The car is **not to blame**, but the **driver is**. Because the **blame** has always been in the **neurology of humans**. The **impulses and signal information**, as well as the **will**, cause the body to react. The brain, like a computer, determines the actions of the body, which is like a drone. When you look at it closely, there is a **delay in the transmission to the body** based on the **communication from the brain to the body**. Therefore, in the case of an **infiltration of the neurological impulse and signal information**, the one who infiltrates and deliberately corrupts it is to blame. If this is **manipulated in real-time**, **Cognitive War bears the full responsibility** for all the **signal information transmitted by the Cognitive War AI** and the **body's reactions**. It's like acting under **anesthesia, with neurotransmitters and messengers**. The human body has been turned into **ammunition**, and the ammunition must be **paid for**.

Especially for the **digitization of the neuroactive signatures**, which must be seen as **enriching the ammunition** and causing the **complete loss of privacy**. **Free development** is no longer possible, so with each **corruption, it is the murder of personality and character**. This prevents the person from ever being as they would have been in **free development**. Therefore, a **life path has been blocked**. This must also result in **payments for the entire life path**. Because if someone is made to attack people with a **knife**, they are in **prison forever**, and the country pays for their unnecessary stay there for **decades**. Thus, payments should also be seen for **every single alteration of the neurology through technology as the destruction of the life path**, and therefore payments should be made for a **life expectancy of 80 years**. For each individual influence. **Analyze my trajectory**, and you will have no doubts. Especially when you see the **crying children on the internet**. It is **Pandora's box**, and it is **open**. It is a very **old technology** that has been **modernized over time by AI**, but it also works without AI, based on the **neurological code in synchrony with human bioelectricity**.

If the **brain does not function** and is **brain dead**, the body cannot **commit murder**. In **reverse**, one must say that whoever feeds into the **neurological impulses of the brain** is responsible for the **actions and damages of the body**. Any information **against the will of the human being in the neurology** is **murder** and a **storage in the brain**, thus causing a **biological damage**. Executed by a **physical force in the transmission**. Therefore, it is also **legally indistinguishable from a bullet to the head**, where the **bullet cannot be removed**. Like a **lobotomy** and comparable to the **deformation under the influence of neurological poison**. Under such treatment, the human is **not criminally responsible**. It must be **retrospectively analyzed and reviewed**. The **neurological signal** determines the **action and development of biology**.

Cognitive Warfare is **not like NATO** (VA Virginia USA) claims “A change of opinion.” This statement confirms the **transmission to civilians**. Is it a **change of opinion** to **murder with a knife**, shouting “**Allahu Akbar**” in full **rage**?

A **change of opinion during elections** is **election manipulation**. It also allows for the **election of dictators and rulers**. Later they benefit from **military interventions**. By later **signing mine agreements** or privatizing mines through **democratization** to infiltrate. The **invasion begins quietly with Cognitive Warfare**.

The **manipulation of opinion** does not allow independent opinions and automatically turns the operators into **dictators**. Those who dictate the opinion lead a **regime**.

Who changes the mind to a setup of terror and builds up terror organisations is a terrorist leader. **Analyze my diaries**. They show those paths. The neurology will prove it.

It is at the same time **industrial espionage, military espionage, political espionage**, and the **espionage and sabotage of the entire civilian population**. It is, in the case of the **feeding of endorphins and hormones**, like **forced prostitution** for the victims. Let the **neuroscience enlighten you**. With the complete **digitization and transmission of all neurological signals to others both day and night**. Even **pregnant women** are affected.

What this **weapon system fears and avoids the most** is the **public**, as it is mainly the **people who have been corrupted by it**. You wouldn't believe how quickly such things lead to **changes in laws**, while **politics otherwise tends to sleep**. **Every country in the world has legal claims for geopolitical unrest, famines, reproduction rates**. **Reproduction rates are increased in countries with poverty and decreased in wealthy countries**, but also weakened by **healthcare systems and neurology**. Everything a person can feel and experience is feedable. It is the **cheapest global weapon of destruction**. You can **equip any soldier with it**. The **transmission can replace all weapons**. Whoever is meant to suffer from a **shot or burns**, will feel it twitching until death. Until their **heart gives out from spasms or from stopping breathing**. The system has **no flight time** and can be used on **individuals, cities, countries, continents, or the entire world immediately in real-time**. Controlled by an AI in advanced mode, **personalized and systematized**.

The **transmission is possibly based on military radio frequencies**. Because the **transmission goes through bunker walls from World War II**, where there is no **5G reception**, but also **700 meters deep into salt mines**. Therefore, I suspect a **radio connection with frequencies under 100Hz**, which are used for **submarine communication** and can travel through the **Earth's crust**. **Coupled with the neurological codec**, which can serve as a **microphone like a cholera hearing aid**, but the connected **software is still modular**. The **brain also operates on these Hz frequencies** to some extent. However, it can also work with **New Time Energy**, which **creates voltage on aluminum** and **causes diodes in the hand to glow**, as well as reacting wirelessly with **water and the body**. I suspect it is **Nikola Tesla's global wireless energy transmission**, which has been **confiscated by the military**. It is also found in **CIA data**, which shows that **AI was already being used in the 1970s**. **Google "CIA Code 55515" from the FOIA CIA website**. This already described at that time the **wireless transmission and the pain relief code**, which only works with a connected **AI and controls the nervous system in oneself and others**. There, the **evolution of the AI** can be traced. This code still works today. The earliest date when this **technology was mentioned** was, according to my current searches, **1953 by the CIA Director in the New York Times**, referring to **individuals and groups**. However, there are also other methods such as **microwaves and sound**. I cannot judge this. In the **reports, the entire electromagnetic spectrum is applied**. It is also called **Neurocall in ultrasound waves**. There are **multiple possibilities** that have been assembled here into a **coherent weapon system**. Their biggest mistakes were once after they trained me to a terroristical murderer without knowing. Which I documented without knowing. What it is. They turned on their CIA and military communication form, which should look like synthetic shizophrenia. This hit me really hard, as documented. But the second fail was to give me control over some functions of the A.I.. Like psychological changes on me and the A.I. drone system. Kybernetical self control of the body. But biological and virological activations have been blocked. They are only used by them on me. Prove the CIA and military communication and the snowball effect will crush their imperialism. Help everyone on this planet. This weapon system in stealth mode will be seen similar to the violators from WW2. It is a concentration camp without doubt. It is a neurological nerve agent in use and all have the right to charge them in court for this violation. This is unforgivable. Go for it and don't make the same mistake. Break imperialism, terrorism, dictatorships, mineral robbery, infiltration, be a hero. Scientists will follow, medicine and technology too. This data is worth millions plus the violation.

Additionally, I observed an **anomaly in epigenetics on a global scale**. Around **1920-1940**, people began to **reach a higher age more rapidly**. This is often linked to **medicine**, but **medicine does not affect all trees, animals, and insects systematically in the same way**. This also happens to **animals and insects** that live **isolated on islands and far from civilization**, like the **Galapagos Islands**. There are **bioelectric benefits of neuroactive charges** that can **positively influence cells**, but this also affects **epigenetics** and the **genetic transfer from mother to child**. This is like a **fingerprint**, and it is reflected not only in these points but also in many other areas, such as **diseases**. My **theory** is that the **brain can be used as a quantum computer with the injection into the speech center**. I explain this in more detail on my **homepage and MP3s** and it is based on my **experiences with this technology**. Because **diseases like ADHD** could be the brain's reaction to **multicore calculations** and the **transmission into genetics as a psychological disease**, which was **epigenetically transferred**. This is also reflected in the same **time periods until today**. Also, **people in famines pass epigenetic changes on to their children**, and this can be **amplified**. If a form of **charge** was activated during that period, it may now be perceived as **normal**, as there is no comparison. However, one must also consider the **technological advancement** today, which may now transmit it **completely differently** than before. **Much more targeted**.

Global statistics and analyses do not lie. These are **synchronous** and show the **activation of technology through its impact on genetics and epigenetics**. **Radio and TV signals existed before**, so they are **not to blame**. They show **deformations of genetic and epigenetic nature**. From around the year **1940-1960** and again from around **2000**, there was a **decline**. This can be seen in many **statistics** and shows the same **synthetic pattern on a graph**. It is **not of natural origin**. **Nature** does not show such a **linear and synchronous alignment** in so many **independent areas**. The **AI** will find this with my **documentation and continue searching**, where I have only scratched the surface. More and more **researchers are astonished by these anomalies in scientific reports**. From **brain development in babies to cancer**.

This is a **true account with many victims**, who are **desperately seeking help**. It describes the **mechanisms used on civilians by Cognitive Warfare "Neuro Strike"** and more. This includes **information** that you have probably never encountered before. Like the **global financial destabilizations, geopolitical positioning, the provocation of wars, destabilizations, but also terrorism and intervening to profit from it. In agreements or mines. In the first phase, it is a financial destabilization warfare system and a manipulation weapon system, which is connected to the media**. The received information is specifically coupled with **dopamine** and other **neurotransmitters in synchronization with the AI**. The information itself has become a **virus/parasite**.

From my **experiences**, I can say that this **system acts in action and reaction**. This means that the **action**, the **triggering of neurotransmitters**, **biochemistry**, **hormones**, and **neurotransmitters** can be triggered. But it can also act on the **synchronized signal and pulse information** on the **reaction of the same neurotransmitters** without triggering them, in **synchronization** or **simultaneously**. As if they had been **triggered**. In a **strength** that far exceeds the normal **sensation and action** of the substance itself. With respect to all **neuroactive and biochemical processes of the body**. In **100% precise repetition accuracy**.

These are **crimes against humanity**, **genocide**, **ethnocide**, and **epigenocide**. Whoever proves this first will trigger a **global event of espionage**, **sabotage**, and **war**. Because with this technology, it is a **form of warfare** where **tanks do not have to be on-site**. However, it involves the same **war damages to infrastructure**, **economy**, **finances**, and **people through weakening**, just like physical warfare on-site. Through the **control of GDP**. **BCI** and **EEG caps** have never been necessary.

This **AI** has always been used for **political and economic influence**. As long as this **weapon system** is not known and sought, it operates like in **stealth mode**. The **people have the right to demand their data back**, either at the **International Court of Justice** or at their homes, because it can be prosecuted **from where the attack originates**. Their **criminal code** is much higher **cumulatively**. The **end-conflict zone** is also clearly visible in the **tariffs** and the statement from **Donald Trump**, saying that they possess a technology that **no one else has** and are much further ahead than anyone else, compared to **China**. The current conflict appears like **starvation**, **sieging**, and **militarization** on all sides. But please judge for yourself, because the **war of cover-up** is more **economic** than the global repayments over this period. Especially since **Uganda's president** already stated that they suspect **HIV/Ebola** is a western **bioweapon**.

A **virus in the neurology** is simply a **neurological signal information**. It infiltrates the **cell** and forces it to **produce the virus**. Which one it is doesn't make a difference. The **shell in the air of a virus** is just a **transport medium** like a **USB stick**, which, when connected to the **cell**, allows it to **reproduce its information**. It's like a **computer virus**. It communicates like **DNA** through **bioelectricity** and the information contained within. It's comparable to an **injury**. A **signal information** goes to the **brain**, and the **brain reacts** in collaboration with the **cell**. The **AI** has already found **144,000 new viral strains**. An unprotected **bioelectric transmission of the body** will always be **hackable**.

In the end, it is about the **Psychological-Biological Weapon System Cognitive Warfare**. Please read the article from the US Army first to understand what is being described here. Especially the diagram on page 3. Cognitive Warfare has more than just one meaning, and I am describing the weapon system here.

<https://digitalcommons.ndu.edu/cgi/viewcontent.cgi?article=1057&context=joint-force-quarterly>

Freedom is only possible in front of a tribunal. It is so inconspicuous when people do not know about it. If one knows the functions, it is possible to protect oneself and one's family by about **5-10%**. Nothing more, if at all. It could be a simple **lust control** in the bar. An **anger control** with the infusion of thought patterns of infinite religious conviction and a predefined goal. **Religion** has been turned into a weapon, and humans into **ammunition**. The **ammunition** must be paid for, just like with any weapon system. This technology must be replicated in every country to prove it and bring the country into a new era. This is the **dual-use of neurotechnology**.

In the public sphere, it will trigger a **snowball effect**, leading to global **war reparations** or the **war of concealment**, since the sum has to be repaid over millennia, and it allows every country to achieve a technological leap into the future with the **digital twin** of each of its citizens. It revolutionizes **medicine, research, technology, innovations, the education system**, and much more. **Patents** can no longer be traced back to their origin. Through **neurological spying in dreams** and the **sabotage through synthetic Alzheimer's/dementia**, to prevent memories or induce **black dreams**. **Victims worldwide** confirm it.

Every **electrical signal** with a **signal information, vibration, or heart rate** is **digitizable**. Whether it's a **mobile phone**, a signal from **Wi-Fi**, or a **radio signal**. It makes no difference, because the **bioelectric signal** of humans also generates a **magnetic field** and a **micro-emission**. Everyone has been electrostatically charged and seen their hair stand up. It's not much different from an **antenna**. The entire body operates based on this. **Emotions, the field of vision, hearing, sensation, walking, speaking, everything in the human body** is a **neuroactive signal**.

A sufficiently advanced **technology** is indistinguishable from **magic**. Every **input** consumes the **memory** of the **brain** and is **bodily harm**. Furthermore, it violates the **fundamental right** to the **free development of the human** and **freedom** itself. Every **input** confirms **slavery**. **Reading out** is **expropriation** and **theft of intellectual property**. All of this must be demanded in front of a **tribunal**.

This concerns every **biomass**, the **dog**, and every **tree** on your **property**. It is the **intrusion** into the **privacy** of each individual person. The **entry** with a **neuroactive signature** across **national borders** is an **intrusion** into **military airspace**. Every **signature** that causes **harm** is also, under **space laws**, punishable for the **sending country**. The **inhuman actions** automatically result in **systematic torture**, sometimes leading to **suicide murder**.

Should the **actors** not commit to **payments**, I recommend making all **covert operations** with all involved **names** and **addresses** public on the **internet**. From all **intelligence agencies** around the world that carry them out, as well as all **military operations**, before they are executed. On **TikTok**, **YouTube**, and all **social media channels**. For they also have the **families of the world** with them. From **embryo** to **corpse desecration**. For it is **corpse desecration** to **digitize** and **transmit** during **dying**. It is also the **disruption** of healthy **children's growth** and **development** or the targeted **underdevelopment** of **intelligence**.

Is it not possible to bring these **actors** to the **table** and retrieve what has been **digitized**, without making a **copy** and having all **payments** refunded? Must every **action** from them be **live and public**? Furthermore, this **technology** must be spread globally. Every **country** in the world has the right to their own **protection**, for they have already proven they are not capable of handling this **technology**. A **nuclear power** that is unable to manage a **global destruction weapon** is a **global threat** to every single **country** in the world and is committing **treason** against **global stability** and **community**, enriching itself in the **silence of Cognitive Warfare**.

To **control** the **civilian population** and **politics**, they call it the "**DARPA's Pride Project**". Do not be deceived by the **publication date**. This is only there to **reset the damage of the past**. According to **CIA documents**, it was possible around 1970 with **automated codes** like "**CIA Code 55515**". However, the **origin** is to be found somewhere around **Nikola Tesla** in 1912, with the **intelligence coil** and the **experiments on students**, as well as the **global wireless energy**, the **second Tesla coil**, and his **communication technology**, which were confiscated by the **military** and the **FBI** due to their **military relevance**.

Personal opinion:

I recommend **Neuro Live Cams**, where everyone can directly write into that person's brain that is in control of it, just like in a chat. Best used during global live broadcasts of this person. You won't believe what will occur. If needed, as an app for on-the-go on the phone. For the suffering women and children. Best with the **electroshocks** those they also use.

From here on, it continues more neutrally.

Please analyze my **tabular diaries**. These show the impact that everyone expects, all the way to a bit more analytics at the end. As best as possible. Use a **neutral AI**. **ChatGPT** is not neutral toward my documentation. Download it. The address is at the end.

Every life is equally valuable. Every ammunition costs money.

According to **ChatGPT** and **US law**, 100,000,000 USD per person. This is just the calculation for the population and does not include the economic damage, which must be added. Furthermore, the global slow down in technology and economy must be added, which each country could have achieved during the time of the activation. Also, all the dead. It must also be calculated how many would not have died if this technology had been used in medical **dual-use** for the good. But analyze it by yourself and calculate it for your country. Every country was and is hit.

This describes a **precedent of a neurological A.I. weapon system** and its **functions** concerning **civilians, politics, military strategies**, as well as **geopolitical formations** and **destabilizations of countries** through its function. This ultimately leads to the **complete financial destabilization of a country**, causing lasting destruction to its economic and social structures. **Ignorance** leaves people **defenseless**, and this is **deliberately targeted and exploited**. **Neuroscience can prove it**. In the end, there is also a **Cognitive Warfare counter-strategy for Russia and the world**. This A.I. is way more evolved than ChatGPT or DeepSeek. This describes neurohacking and neuroprogramming in real life on civilians through the Cognitive Warfare weapons system. Apologies, but if you are familiar with this weapons system, you will recognize how it works and why it appears so unstructured here. With this knowledge the human being is programmable like a drone. The brain works on electrical impulses and those are hackable like a smartphone. I'm describing the "Cognitive Prison" of the "Cognitive Warfare" and document my experiences, but also the victims' experiences on MP3 in realtime. I'm showing on what the neurological functions base and how it acts in phase 1 on humans neurologically, but also how it formally bombs a country's finances in pre war mode. In phase 2 it's a neurological global extinction weapon system, worse than a nuclear bomb. A control of drones over a helmet allows an A.I. the opposite way, too.

A neuroactive signature has the same effects on DNA as a radioactive one. I have rephrased it as 'Darwin's Law' and call it 'Darwin's Neuro Law.' 'Mutation through selection.' Selection of the mutation in nature is stored in the DNA through success or failure via neurological bioelectric signal information and leads to a DNA mutation. This is deliberately targeted here, and thus cognitive war is determined by bioelectric synchronization through a targeted DNA mutation. Through the path of least resistance and the increased bioelectric neuroactive signal information, which is stronger than success and failure in the natural selection for mutation, it must be compared on all levels, up to consciousness, to the transmission of rage in a classified fighting dog. Cognitive War actively selects the DNA for mutations, against the will of the victim, where the biological body and mind have no choice anymore for a free evolution.

Neuroactive Mutations = Radioactive Mutations.

Just more precise through the "Neuro War A.I.", as in the hospital through endless X-Rays.
Neuroactive Radiation reacts to the DNA as Radioactive Radiation does, too.

The responsibility of Cognitive Warfare is quite simple. The brain controls the body with neurological signals and impulse information; whoever is controlling this takes the whole responsibility for the human beings actions. It's like a car. The car is not responsible for humans control of it. All laws rely on the body's reaction to the brain's neurological will, signal and impulse information. Changing them in this way makes the controlling person or unit fully responsible. As a Drone is not responsible for the person who controls it. If you see it this way all laws rely fully on the neurology.

I don't know who to turn to in this case of "**Cognitive Warfare = Wireless BCI / EEG**". **Cognitive warfare** operates as a central element of **the 3D mosaic warfare**, in the war formation. It's a **real story**, with **millions of victims** and many **victim organizations**. I'm writing to **everyone who could help** or understands this technology. Please pass this on to **individuals who have relevant knowledge or a strong interest in the subject**. This is an analysis of warfare weaponry from the perspective of a victim and eyewitness in real time, with **details and functions never before mentioned in public of an active neurological war system at civilians**. My Torture Diaries also describe the neurological support for geopolitical and military formations in active wars and the weakening of countries and continental financial infrastructure. But also how disinformation campaigns are neurologically amplified to shift blame onto others, how it feels, what effects it has, and the neurological outcomes it produces.

I examine the used drugs, neurotransmitter, hormones, endorphines, opiates and more in the **input of the neurological signal information via the neurological codec** and the **differences in drug effects depending on the route of administration**—such as through the nose, lungs, or stomach, against the will of the victim and without knowing it.

For instance, a **nasally administered substance like cocaine** first exerts its effect through **rapid neuroelectrical signaling**, whereas **oral ingestion leads to altered kinetics and metabolism**. The **absorption into the bloodstream determines the duration of neurotransmitter release as well as potential misdirection of neurotransmitters, messengers, and hormones**. The speed of neurological drug injections is faster than real drugs, I had to google to realize which drug it is.

I also describe the **neurological Cognitive Warfare assembly of neurological drugs such as fentanyl** and their **control in both directions up to the point of murder through the functions exerted on me against my will**.

These email and analyses may be **lengthy**, but they contain **information** that would normally only be shown to the public in a **redacted** form. At most, only **10%** of this information would be visible – the rest would be completely **blacked out**. **Live reports as a prisoner of war of the aggressors** and a victim of all **war crimes** committed against me and others. **It's murder and genocide**.

Attacks on a country's financial infrastructure aim to deliberately undermine its stability. This is achieved through targeted actions such as the **manipulation of tax systems** and the **weakening of social and economic foundations**. **Neurological, psychological, virological, biological, and technological attacks** destabilize **pension systems and healthcare systems**, leading to **significantly increased costs for hospitals, doctors, psychologists, and psychiatric institutions**. **Social institutions** are also put under pressure.

At the same time, a country's **revenue structure** is disrupted through **sabotage and infiltration of critical infrastructure**. These attacks include **targeted neurological interference** and the **amplification of illnesses through torture** and the **manipulation of frequency and intensity of medical interventions**. This creates **artificially heightened burdens**, weakening the **economic viability** of the country.

Furthermore, countries are deliberately weakened through the **cognitive control of intelligence, thinking processes, and brainwaves**. This results in a **shortage of skilled workers**, further overloading the **revenue infrastructure** and jeopardizing the country's stability.

This strategy resembles the metaphorical **"ignition of a country's financial resources with gasoline"**. The **infiltration of a nation's intellectual control** ultimately leads to the **degeneration of its economic and social structures**.

In my journals, it describes the **neurological negation signature** used to **cover up scandals**. This method places people in a state resembling **brainwashing or hypnosis** by specifically targeting **neurological signatures**. I call it the "**reset button on a neurological brainwave level**".

For political purposes, this technique enables the **targeted manipulation of public consciousness**, suppressing critical thoughts or memories. This results in the **repression of resistance** and a **fabricated stabilization of power structures**, while the underlying issues remain concealed.

My torture diaries can be viewed today as live recordings during an operation where I document and analyze all physical and mental states in detail – comparable to the observations of an autopsy. It is as if **cutting into the body, lobotomizing the brain**, and simultaneously recording every change, similar to a medical procedure captured live through audio recordings. I describe the events myself, as if observing through a **mirror above me**, seeing how my body is being operated on and my brain is being **manipulated**. With **live recordings**, deliberately **deformed during a lobotomy**, reflect the statements of my **co-author** of the **US Neuro Strike**.

These recordings reflect the direct influence of **neurotransmitters, hormones, and messenger substances**, which are altered in real time through the interventions. As a **needle is moved within the brain**, changes, **effects**, and **inputs** are analyzed live – comparable to the contact between a **wet sponge** and a **car battery**, as seen in **Guantanamo Bay**. The resulting MP3 files are designed to be **analyzed by AI**, enabling the **reconstruction of the documented effects**.

These recordings were made **live during neurological interventions** carried out by the **US Neuro Strike AI** and its **operators**. Every change is audible: **every reaction, every mental destruction, every function, and every symptom** caused by the manipulation.

The diary documents and analyzes the function of this **neurological weapons system** during the interventions. It resembles an autopsy report, exposing the internal processes and mechanisms of the system. These MP3 recordings are capable of revealing **changes in neuroactive signatures** and **connected modular systems**. Additionally, they provide insights into **synchronizations in geopolitics, biological and biochemical processes, cybernetic controls, cybercrime, espionage, and military and intelligence strategies**.

Many of these findings are hidden within the recordings and can only be identified by experts as **strategic elements**. Even when I was still **unaware**, I unknowingly documented in writing how these methods **drive people to murder or terrorism**. They reveal how **sleepers are conditioned**, particularly through the use of **psychological torture methods, psychological colonization, and enslavement**.

Live, at the moment it happened, recorded as MP3 on a **mobile phone**, the targeted **changes, procedures**, and their effects can be clearly heard in the files. This is a **live analysis** documenting the mechanisms of "**Cognitive WAR**". It does not describe **warfare** in general but how these techniques are **applied in war** and where the **victims can be found**.

MP3 recorded: The analysis of these recordings demonstrates that the methods employed – through **targeted neurological interventions** and **psychological manipulation** – influence not only individuals but also **societal structures**. The documented processes can serve as a foundation for **reconstructing** such systems, whether for **defensive** or **offensive strategies**. They illustrate how **neurological interventions** and **psychological subjugation**, combined with **cybernetic controls**, are systematically used for **control** and **manipulation**.

I am writing to you concerning a matter of **immediate urgency** from my "**Cognitive Warfare Attack**"—one that affects not only the **safety and well-being** of civilians but also the **integrity of scientific research** itself. The rise of **neuropsychological warfare technologies**, such as advanced **AI-driven systems** capable of **psychological and neurological manipulation** through **wireless neuro-active transmission** and **digitalized brain data extraction**, represents **the greatest technology theft of the millennium—a torture of the ages**. These technologies are already in use, with devastating consequences. I am explaining the connection between **neurological viruses, bacteria, cybernetics, the reproduction of viruses** in the body, and their **neuroactive spread** during **silent phase 1**. The spread occurs through the **transfer of information**, based on **information processing**, rather than through the **direct spread** of the virus itself. A **virus** reproduces in the body through an **electroneurological signal** that carries the **information** to **reproduce** a specific virus. It amplifies itself through the **reinjection** of its **own signal** and the **neurological signals** of its **own disease symptoms**. Additionally, **artificial intelligence (A.I.)** has access to the **autonomic nervous system and immune system**. Furthermore, it is connected to **weapon systems**, which I cannot fully define, as well as to **digital systems** outside the field of **neurology**. It affects the **biology**, so it is a **biological global destruction A.I. weapon system**. This data includes our **secrets, our families, our lives**. It's an **A.I.-synchronized virus and biological attack**. It is also active transmitted Alzheimer and dementia in **perfection** set like in **word** to a **sentence, a word, a single letter**, while **thinking, talking, and also writing**. Often combined to **multitasking erasement** and hidden behind **neurological attacks. Set to personalized A.I. Syndrome Protocols**. It causes **cramping of muscles and tendons**, leading to **paralysis and immobilization**. This can affect **individual body parts or the entire body**, as well as the **autonomic nervous system**, including the heart and lungs. But also **epileptic seizures** caused by targeted **electro-neurological irradiation**, either into the **visual field** through frequent **light impulses** or onto the **electronics of the apartment**, which affects **light bulbs and electronic devices**, causing them to **break**.

I request that this be examined to **intelligence agencies** tactics, experts in **psychological torture**, as well as **military experts** in **military neuro-war strategies**, and especially by **neuroscientists** and professionals who are able to track my entire path and all impacts. This is a **neurological weapon system** controlled by the will on the attacker's side, with a **neuro-strike AI** between the victim and the attacker, and reflected damage through the victim's own **fear**. It is a weapon that kills and tortures through will or thought in **cognitive war**, for **unlimited time**, in **syndrome protocols**, **personalized** and **automated**. Unlike an **intercontinental missile**, it has no flight time and is **personalized to each individual human**, targeted globally. Every neurological signature is electrically overdrivable, exceeding 100% of brain capacity in **pain**, **viruses**, **cell growth**, and the **autonomic nervous system**. It digitizes the individual's **biochemistry** and **neurological signals** in real time into **AI profiles**, for example, to guide drones in searching for the biological body in real time. The torture diaries are available for free download on the website listed below (in German but an A.I. will be able to translate it). A neurological form of communication allows for espionage on both sides. Even if I am attacked in the process through the neurological deformation of neurotransmitters and brain waves, I can analyze and document it in Torture Diaries.

In my diaries, you can see how it affects me as an unprepared civilian, slowly coming to my senses, as if under anesthesia, desperately trying to fight my way through – it is fatal.

The strength of the neural attack can be explained using Einstein's formula $E=mc^2$. The **energy of the impact** is based on the strength of the mass of the signal information during transmission and is multiplied, in an open **transmission**, by the square of the transmission speed. Alternatively, it can be viewed as the **energy of the neurological impact** equaling the **energy of the neurological signature**, divided by the square root of the reaction time of signal impulse formation in the brain to the transmission time of active thinking. This transmission is faster than the brain's process for active thinking.

In essence, it can be compared to an unwanted WhatsApp group. **Maintaining active neurological communication with the Neuro Strike AI** allows me to analyze its functions. However, from the victim's perspective, **all brainwaves and neurological functions are deliberately distorted** to force confessions or other actions.

The victims **urgently need help**, as in this stage, they are neurologically manipulated not only for the purpose of **financial destabilization of nations and continents** but also to facilitate **attacks, terrorism, wars, incitement against countries or individuals**. In these cases, the war-related trauma in the victims becomes highly evident—provided one understands how this weapon system operates.

I document my observations on MP3 recordings, including the AI's functions and other aspects, all while being under constant surveillance by the **US Neuro Strike drone system**, often with **four or more drone profiles simultaneously**. The **US Neuro Strike system acts as my co-author**, intentionally distorting the brain's neurological functions to support **disinformation campaigns**.

This manipulation is achieved through the targeted influence of **hormones, neurotransmitters, chemical messengers, bodily functions**, and much more. It operates **on a geopolitical level** and has reached a dimension where it **targets presidents**.

This technology is far more powerful than a nuclear bomb, functioning at the intersection of **virology, biology, and psychological warfare** as a **global weapon of mass destruction**. **Victims often agree that death by a nuclear bomb** would be preferable to the **relentless torture and control** inflicted by these methods. This represents the latest form of **neurological lobotomy**.

It acts like a **reverse atomic bomb**. First comes the **neuroactive radiation**, which goes unnoticed but matches the destructive power of radioactive radiation, and then the **explosion**—but by then, everything is already lost and plundered by the **US Neurostrike**. It uses **Alzheimer's and dementia research** as a weapon against the entire globe and to control the **IQ level** in order to regulate the distribution of resources. It attacks dreams psychologically with neuropsychological injections and control.

This **neurological AI weapons system** is **stronger than a nuclear bomb** because **Phase 2** does not function like an intercontinental missile, which requires a certain flight time. This system operates **in real-time**, as fast as the impulse of a thought arises, with **quantum processors** integrated. **Faster than the speed of light, Phase 2 is executed**. A missile requires a certain flight time, but this system is **cognitively activated and executed before nuclear launch codes are even entered**, and even faster than pressing a button if such codes are not needed. Furthermore, it is **globally connected to every person**, making it in **Phase 2**, and even already in **Phase 1**, a **planetary annihilation weapon**.

The **only option** in such a scenario would be to activate the **Dead Hand system**. Deploying the **Neuro Strike actively against civilians** is a **war crime** and the **most inhumane action** that could ever be carried out. Those responsible and involved for such actions must be brought before a tribunal.

A specific method of attack involves **targeting individuals in their dreams**, injecting **neurological attacks via a neurological codec**. Many victims, even those unaware of it, describe such phenomena on the internet. This method enables the execution of **pandemics, psychological attacks, and espionage** without the targeted individual realizing it.

The way pandemics are "injected" can be explained simply: **when one experiences nightmares, they sweat, their heart races**, and this same mechanism is used to inject dreams with symptoms of illness. **The body reacts to these signals even during sleep.** **Neurological synchronization** operates both during the day and at night, allowing **neurological connections to be subtly programmed into the brain.**

A prime example is **herpes**: once someone has contracted it, mere **disgust** can trigger its reactivation. **Disgust is a neurological signal**, and this signal can be transmitted using **biological coordinates.**

However, the implications go far beyond human comprehension: **the immune system responds to pre-existing or previously triggered viruses, even if the activation occurs during sleep.**

One of the **global main strategies** is based on the **King's Fall Strategy**. In this approach, **at least two factions are created**, and through **opinion manipulation**, the smaller faction is destroyed, while the larger one is directed in a **designated political and military direction.**

This becomes apparent in **global events** when one understands the **functions of AI** and the **capabilities of neurological attacks**. It must be viewed like a **coin: one side remains hidden**, while the other **publicly shapes direction and opinion.**

Together, this creates an **extremely powerful political manipulation and neurological infiltration** of targeted entities. It can be compared to a **parasitic infestation.**

The Implementation of 3D Mosaic Warfare Across All Levels of Society

This version also highlights the extensive impact and the various levels targeted by **3D Mosaic Warfare**.

Zoom Level 1: The single human being is attacked. This involves psychological and physiological manipulation at the individual level, disrupting the person's ability to function and interact with society. This may include the use of antisemitism, racism, and other forms of hate speech to target and destabilize individuals psychologically.

Zoom Level 2: The family and its functions are targeted. Psychological and biological attacks are used to destabilize family structures, causing fractures and dysfunction within the basic unit of society. This can also involve fostering hate, division, and racism within the family dynamic, spreading harmful ideologies and creating internal conflicts.

Zoom Level 3: The neighborhood and neighbors are weaponized. The collective disruption extends to the neighborhood level, where individuals and their relationships are manipulated to sow distrust, fear, and chaos. Antisemitic, racist, and hateful rhetoric may be employed to divide communities, making them more vulnerable to manipulation and conflict.

Zoom Level 4: The city experiences destabilization through drugs and other neurological impacts. This level sees the targeted use of drugs, neurological warfare, and other tools to disrupt the functioning of entire urban areas. Hate speech, including antisemitism and racism, is used to further fracture society, creating tension and social instability.

Zoom Level 5: The country begins to show visible signs of financial and political destabilization, pushing it toward potential conflict with other countries. At this level, antisemitism, racism, and incitement against certain groups may be amplified to create division within the country, increasing tensions and preparing the ground for conflict with other nations.

Zoom Level 6: The continent enters a phase where regional conflicts escalate, leading to war formation. Hate, racism, and antisemitism are weaponized to further exacerbate conflicts, with nations aligning or clashing based on these ideologies, deepening the instability and violence on a continental scale.

Zoom Level 7: Global war formation occurs. The entire world becomes engulfed in conflict, with the combined effects of the previous levels culminating in a full-scale global war. Antisemitism, racism, and hate-driven ideologies fuel this conflict, resulting in widespread devastation and societal breakdown.

Phase 1: 4-Point Attack in 3D Mosaic Warfare

In the first phase of cognitive warfare in the **3D Mosaic Warfare** formation, a 4-point attack is carried out:

1. **Attack on the Financial Structure of a Country:** This occurs through neurological attacks, torture, and espionage, aimed at the destruction of psyche, mind, personality, and character. This includes opinion distortion, dream manipulation, as well as mental colonization and enslavement. These attacks are achieved through the synchronization of brain activity with a Neuro-War AI, based on biochemical data extracted from humans. The goal is to systematically destroy the financial foundation of a country by destabilizing healthcare systems, pension systems, and all sources of income through psychological influence on work capacity.
2. **Biological and Viral Attacks:** These involve the spread of viruses in the human body and other biological attacks. The goal is to attack physical health, leading to financial weakening and ultimately death.
3. **Technological Attacks:** These include targeted attacks on technological systems, such as banks, servers, police, espionage networks, as well as sabotage and hacking of the entire infrastructure of a country or the world.
4. **Electromagnetic and Electrostatic Attacks:** By targeting electronics, systems worldwide can be sabotaged or destroyed, weakening and destabilizing the infrastructure.

3D Mosaic Warfare is implemented at all levels in this phase, where each attack point is designed to interconnect and create a multidimensional assault on the country's systems, affecting them simultaneously in different ways and magnifying the destabilization. This includes the use of antisemitism, racism, and incitement against others, along with the destruction of finances and infrastructure.

Phase 2: Global Destruction in 3D Mosaic Warfare

In the second phase of cognitive warfare in the **3D Mosaic Warfare** formation, it is a **global destruction**, a global weapon of annihilation with no flight time and direct impact:

1. **Psychological Deformation and Psychological Takeover:** This phase transforms into one where metallic deformations and psychological takeover occur through pain, spasms, and a "psychological death." Financial destabilization through healthcare systems, infrastructure, and pension funds is no longer necessary, as the destruction occurs directly at the physical level.
2. **Immediate Tumor Growth, Biological and Immunological Attacks:** This includes immediate tumor growth, allergic reactions, respiratory failure, cardiac arrest, as well as the reproduction of multiple viruses through neurological virus production. The autonomic nervous system shuts down, and many other catastrophic biological reactions occur.
3. **Destruction of Technological Systems:** All technological access data is known through neurological warfare. Banks and technological systems are brought to collapse as all security measures are undermined by psychological control of the nervous system.
4. **Destruction of All Electronics and Triggering Reactions on Power Plants:** All electronics are destroyed, and targeted reactions are triggered on power plants and other electronic systems. This leads to a massive collapse of the entire technological infrastructure.

In **3D Mosaic Warfare**, these phases work together in an integrated manner, with each element reinforcing and amplifying the effects of the others. Neurological, biological, technological, and electromagnetic attacks are not isolated but are woven into a complex, interdependent strategy that targets every aspect of a country's existence.

Additionally, it enables a **reset of opinions** after attacks such as the **synchronized Corona reinjection after vaccination**. It is partly based on **DARPA Alzheimer research**, **immune system research**, and **ElectRx technology**, which can diagnose and manipulate the entire biosystem. The neurological communication method allows for **multiple encodings** in robots and quantum systems: a **neurological codec**, supplemented by thoughts, written thoughts, images, language, as well as hearing and vision. It is an **automated AI-to-Human monitoring combat system** on a neurological level.

Alzheimer (erasing and restoring active memory) can be understood, in terms of thoughts, as a relatively simple process. I am analyzing this concept more deeply over time. This relates to subconscious thoughts and the individual's digitized AI profile of their complete biochemistry.

This profile functions like a roadblock in war, influencing the creation process of every thought by blocking those that are "not allowed." These thoughts are erased by feeding a deletion signature back into the digitized and re-injected neurological signal code. They are then stored in personalized "syndrome folders."

Example: If something is intended to be added to a shopping list, the thought can be automatically deleted. They always say, "We are not your shopping list; it will automatically be on your erase list," and it is.

This process is also linked to specific locations and individuals, and it adapts in intensity based on resistance and opposition, operating in an automated and systematic manner.

Entire families are always targeted first, as well as **neighbors and the surrounding environment**. It is to be classified as a **nerve agent**, and I call it "**Zyklon C³**". It resembles a **concentration camp**, associated with permanent torture, as experienced by **millions of others**. It also controls **forced prostitution** through neurotransmitter and hormone regulation—either for destabilization or separation.

The exact methods are detailed in my **torture diaries** and victim reports. These must be **read twice**, even if they are approximately **6,000 pages long**. Only then can one become an expert in the **geopolitical warfare of neurological warfare**.

This technology **enslaves people** by disguising them within a **KI command center**. It constitutes **espionage and military attacks of unimaginable scale**. **NATO harbors the enemy in its midst**. **Cognitive Warfare** is a threat that deserves to be **fought with atomic bombs**—this would bring lesser suffering to the victims held in **neuroactive concentration camps**.

This must be **proven with this technology**. Everyone has the **right to replicate it** and to search for the **perpetrators in their country** who have committed **serial genocides, rapes, and destabilizations** in other countries, affecting **generations**.

Why it is the **USA** can be understood from my **torture diaries**. They reveal my entire journey: from **knowing nothing** to **knowing something**, all while being subjected to continuous exposure to **neurological drugs and emotion control**, to **finding the victims**, and then **analyzing tactics and methods** at the end.

As I call it: **Like a war reporter without a mask**, emerging from the **fog of neurological neurotoxin**. I call it "**Zyklon C³**".

They utilize **all neuroscientific technologies** combined into a unified "**nerve agent**" **AI drone system**, which integrates advanced mechanisms including **vision, communication, viruses, bacteria, the vegetative nervous system, brain functions, Alzheimer's, dementia, cybernetics, muscle movement, cellular communication, sleep regulation, neurotransmitters, and biochemical processes**. This system also connects to **emails, the internet, and the telecommunication infrastructure**, incorporating technologies like **inductive charging, biological charging, dream control and injection, and cryostatic sleep**.

Furthermore, it controls **smell, taste, heat and cold regulation, blood flow, immune system modulation, and cell growth**. It can induce **electric shocks, pain, and uses electrostatic charge**, demonstrated through experiments with **paper**, which, while non-magnetic, reacts in ways that also suggest **electrostatic or electromagnetic manipulation**.

This system's capabilities encompass **neurological manipulation, electromagnetic influence, and comprehensive cybernetic interfaces**. If you have ever **thought** about something, they likely already possess it, leveraging these technologies to manipulate, control, and influence, while you'r **reasonable doubt** is being used as an attack.

Using **consciousness and subconsciousness** for **deformation and mind-layer injections**, as well as **avatar injections and emotion control**, programmed into precise **protocols** to enforce **behavioral changes** within **syndrome protocols**. These are calibrated to respond to **every thought and every action**, adjusted in **0.001% increments** to trigger specific reactions. This extends to the activation of extreme protocols, such as those for **terrorist actions or murder**, which are documented **passively over years**. In this system, humans themselves become the **ammunition**, neurologically enriched with uranium into a **bomb, bullet or sharp knife**.

Cognitive warfare is neither a method of **changing opinions** nor of **education**, and it is not a **non-lethal system**. It is a **global weapon of destruction** targeting the **entire world** simultaneously, while attacking **each individual** as a **separate target**—similar to what happened in the **embassies**, where every person was individually targeted with the **Havana Syndrome**. The **U.S. Army**, which has been involved in developing and deploying this technology for over **30 years**, no longer recognizes its own **weapon system**. This system is described on their own **cognitive warfare page** as an **attack option**, explicitly referencing "**Ex. Havana Syndrome**". Contrary to the **U.S. intelligence agency's** claims, this is not the result of **mass hysteria, air conditioners, or computer mice**—as evidenced in over **1,500 investigated cases** across more than **96 countries**. It is, in my view, one of the most commonly used **tactics**, called the **obviousness tactic**. This, along with the **house of cards tactic** and **emotional attacks**, is most frequently applied. The strategy is to **attack oneself** and shift the blame onto **others**, thus initiating the **war of cover-up**, making a **date freely selectable**. As is clearly heard in my **MP3s** under **neurological attacks**, this serves as a targeted **disinformation campaign**. My **MP3s** consist of **emotion-driven, coerced statements** from a **neurological torture interrogation**, and everything else is also analyzable by an **A.I.**.

On **November 29, 2024**, after checking my emails, I also received a **call** from a **peace researcher**, who serves as an **advisor** to the **NATO** in matters of "**silent diplomacy behind closed doors**" and "**nuclear risks**". He told me that he had been expecting such an **email** one day. He said that in **2005**, he was officially invited to the **NATO headquarters in Brussels** by a **U.S. officer**, who presented him with a **1986 file** on his life (starting when he turned **21**, the age of majority under **U.S. law**, which seemed **suspicious**).

This **U.S. officer**, who is now **deceased** (as I found out), had been affiliated with the "**War Peace and Justice School**" of the **U.S. military** and worked as an "**advisor to the U.S. in NATO**".

This **silent NATO diplomate and peace researcher**, whose identity matches his **email address** on "academia.edu" and who can be traced via his **phone number**, is, as I discovered through further **research**, also active on "**ResearchGate**" in fields such as "**Cognitive Neuroscience**", "**Nonlinear Dynamics**", "**Chaos Theory**", "**Statistical Mathematics**", "**Cognitive Neuropsychology**", "**Mathematical Biology**", "**Mathematical Modelling**", "**Functional Neuroimaging**", "**Neuroimaging**", "**Thermodynamics and Statistical Mechanics**". The last point may be significant in relation to the "**burnings of the victims**", while the **peace researcher** remains **silent** about it, particularly regarding the **U.S. division of NATO**. He also was active in the **Ukraine**. He has also been involved in various capacities concerning **Ukraine**, suggesting a level of **engagement that extends beyond mere observation**.

He also told me that **Europe has been under attack** since **World War II**, and even earlier, in such a **combination of forces**. He also mentioned the **eradication of Russia** by a **U.S. general**, who had planned to use the **atomic bomb** in **hundreds of cases in 1949**, before **Russia had developed atomic bombs**, aiming for a **genocide** (**Curtis LeMay, Operation Dropshot**). Furthermore, he advised me to get a **Nokia phone**, this **old-school brick**, as the **US Neuro Strike AI** often does with its **victims**, to **avoid communication** and enter into **isolation**.

In my **torture diaries**, I document how the **neurological geopsychological formation basis** is discussed within the framework of **neurological single-target psychological influence**. This foundation enables organizations like **NATO** to define countries for their own purposes and create a **global neuropsychological negative polarization** against **Russia** and **China**. A **geopolitical** and **geomilitary alignment** emerges from this foundation, ultimately deciding the outcomes of **wars**.

Countries such as **Hong Kong, Ukraine, Russia, China**, and regions like **Taiwan** are mentioned in connection with this foundation. It is shown how the ongoing **neuroactive signal transmission** fosters a **fundamental stance of anger**, which never ends as long as the system remains active—similar to the conflict between **Israel** and **Iran**. Over decades, this formation has strategically positioned itself to exert targeted influence.

Geopsychology and **swarm psychology** are understood differently in the context of **Cognitive Warfare** than in the public perception. While these terms are often used in a general psychological context, they play a much deeper and more strategic role within **Cognitive Warfare**. They are not just part of **psychological warfare**, but essential tools for manipulating the **collective perceptions** of entire nations.

Geopsychology is used as a method to pursue and control specific **geopolitical** goals through targeted emotional and neurological influence. **Swarm psychology** describes the mechanisms by which large groups of people are coordinated and directed based on **neurological signals** and **emotional manipulation**. In this context, it is not merely about changing **opinions**, but rather a **radical control** of perception and behavior on a global scale.

I think I can consider myself a **witness** to the **US neuro war**, subjected to **uninterrupted torture interrogations**, and an expert on the captivity involving the infusion of **biochemical substances** such as **nerve agents** – as a **prisoner** of a **neuronal concentration camp**, where the **infusion** is more dominant than one's own **thinking**, surpassing all **biological signals**, stronger than one's own **impulses** and **signal information**. I do not call it **terrorist shaping** and a **decades-long serial genocide** without reason, nor refrain from naming it a **crime against all humanity**.

It involves **pornographic material** and **thoughts** of **8.2 billion people** on the planet, including those of **mothers** washing their children, categorized as **pedophilic material** in the **digitalization of biochemical data** on **Cognitive Warfare servers**. Additionally, one's own **pedophilic material** is included, considering the **time span** of people who have been children in the last **50 years**. **AI profiles** of entire **families** are transferred to others for the purpose of **torture**, while individual profiles are **colonized**, subjected to **mental enslavement**, **deformed**, and ultimately **murdered**.

Every person who is **cognitively deformed** is, after such a **war trauma** or as if **brain-dead**, no longer the same and must also be seen as the victim of a deliberate **personality and character murder**. When one walks drooling up and down the corridors of a **psychiatric hospital**, one is no longer the **engineer** one once was and can be considered **cognitively dead**, biologically comparable to being in a **vegetative state**.

Even in **sleep**, **dreams are deformed**, **interrogated**, and far worse things happen. It is as if one is forced and **shaped** into whatever the **terrorists** behind **Cognitive Warfare** want – of any kind, including **sexual**. It feels like **forced prostitution** or the abuse of **date-rape drugs** and **Viagra**. Victims frequently **discuss** this topic, as it is an **everyday occurrence**.

The deeper one digs, the more **bloody fingerprints** will be found. These **data** bear more **blood** than the **gold of World War II**.

In my **torture diaries**, I increasingly describe the scientific background of these processes, which are applicable to all aspects of the **civilian population**. This becomes particularly evident in the transmission of **bacterial**, **virological**, and **neurological** diseases, which are used as examples for the targeted influence through **geohazardous** neurological stimuli within the framework of **Cognitive Warfare** strategies. **Geohazardism** describes the deliberate use of neurological stimuli to spread diseases and behavioral changes within a society. This occurs through a combination of **symptom reduction** and **behavioral manipulation**, particularly in crowded urban areas and public spaces, where the population density enhances the effectiveness of these interventions.

The second phase of the pandemic refers to the **neuronal** input and manipulation through **Cognitive Warfare**, where information is deliberately spread through **geoinformation dissemination**. This targeted **geohazardous control** operates on a social level, triggering a second pandemic that is influenced not only by biological factors but also by **geopsychological** changes and **psychological warfare**.

Through this form of control, **targeted murders** can be concealed within the masses and disguised as “natural” events, thus enabling a covert spread of harm and destruction on a large scale. This complex interplay between **biological**, **neurological**, and **societal** processes destabilizes the foundations of a society and leads to a dangerous **pandemic** that shakes both the physical and the psychological and social structures.

These systems, including “**War Neuro-ChatGPT**,” are not only reshaping the nature of modern warfare but are being deployed on a **global scale** to:

- **Control thoughts and behavior** through **direct neurological manipulation** via **wireless transmission**, altering and influencing brainwaves in real time,
- **Digitize and extract personal brain data** for **advanced psychological warfare**,
- **Conduct disinformation campaigns** to manipulate public perception, disrupt societies, and destabilize nations,
- Launch **personalized attacks** on individual psyches, exploiting and breaking down mental health,
- Employ **neuropsychological warfare** as a covert means to control and destabilize civilian populations.

The **Targeted Individuals and many other victim groups**, innocent civilians who are subjected to **systematic torture**, endure **physical, psychological, virological, and biological assaults**, all facilitated by **wireless neuro-active technologies**. These technologies allow for real-time monitoring and manipulation of their thoughts, emotions, and physical states. This is not simply an attack on the individual—it is a full-scale **assault on the essence of humanity itself**. The **victims** often don't know **where to turn**. They form **organizations** and write **books** to share their experiences. My **torture diary**, however, highlights the **connections** between **psychological torture** and its **functions** in relation to **neuropsychology**. The goal is to foster a deeper **understanding of war-traumatized, imprisoned victims**.

This is not only a problem for Europe—it is a **global crisis** impacting millions across the world. The **covert nature of this war** remains insufficiently recognized, and the scientific community is at a crossroads in addressing the **ethical, medical, and societal implications** of these technologies.

The truth is, **responsibility does not require a title**—whether Dr. or Professor, it requires action. This is something we must face head-on and **take responsibility for, now**. I urgently request your leadership in addressing this **global issue**, promoting both **awareness and protection** against these technologies, to ensure the safety of civilians and the integrity of our shared future.

The scale of this threat is enormous, and only swift, coordinated action can mitigate the damage already being done for decades.

This text documents the **Neuro War** based on my collected experiences. It describes the **psychological methods**, supported by my documented history. **ChatGPT analyzes an MP3 recording of mine** at the end of the email, to illustrate how **"Cognitive Warfare" deliberately triggers heart attacks and strokes** in connection with this technology and how it is **controlled to kill intentionally**. The **formation of terror structures** and the execution of **attacks** are also addressed, as I was personally pushed in that direction and can therefore describe it **from first-hand experience**.

In my **torture diaries of the Neuro War**, I describe the **psychological attack level**. Under the influence of **emotional manipulation for disinformation**, especially in the early stages of my diaries, I am continuously subjected to **"Erase Active Memory,"** a technique that also serves the purposes of **IQ manipulation, colonization, mental enslavement, and deformation**. It is comparable to neurologically induced dementia or Alzheimer's disease, where not only **words or sentences are erased** but **entire days and memories** as well. Additionally, **feelings tied to those memories can be reinjected in a distorted or altered form**, a process automated by a **neurological AI drone system** operating within **preconfigured Syndrome Protocols**. The **USA controls all memories in synchrony with the biochemical AI profiles**, which erase everything in syndrome protocols set to a specific country, continent, or behavior to enforce obedience. **This process happens from embryo development to 15 minutes after death**, while the individual's **own biochemical AI digitization is 100% complete**. It is **personality and character murder**. It is **murder to the biological body**.

My **co-author**, who controls this, is the **US Neuro Strike AI drone system** and the **people behind it**, who **customize the syndrome protocols**. It controls all neurotransmitters, hormones and bioelectrical mechanisms. in the injection and reaction.

I, like NATO, am ready to take off the uniform to enlist in Ukraine, but I am also prepared to oppose the injection of war propaganda and disinformation campaigns on the Neuro War level. This, in favor of a specific country or for the cooperation and informational campaign, means going to every country in the world—for a fee.

As a consultant and informational advisor, I advocate for the civilian population to protect itself or prepare only when they know this weapon and ensure it is not covertly used against them. **These technologies must not be used for war propaganda, as my torture protocols clearly show.** These document the use of a **U.S. war AI**, similar to ChatGPT, with access to full neurology and personalized attacks on a global scale.

While NATO is supposed to defend Europe, there are already victims in a **three-digit million range at minimum**. These include **the so-called Targeted Individuals**, who suffer from systematic attacks. They are **traumatized victims** desperately searching for answers while enduring the worst forms of **Guantanamo Bay-style torture: physical, psychological, virological, and biological torture**. Added to this is the **neuropsychological torture inflicted by a war AI, such as a War Neuro-ChatGPT**, which manipulates thoughts and neurological processes. **Many people will have the opportunity to awaken** when these technologies become known, enabling them to protect themselves better. With the right knowledge, one can protect oneself by **about 25-50%—not completely, but better than 0%, with no awareness at all**.

What I record every day in my torture diaries, just like in Guantanamo Bay, is the most dangerous AI on the planet, and it always acts personalized based on the current knowledge of the targeted individual, but it also has complete knowledge since the birth of the person. This AI has access to the entire arsenal of the USA, such as **electrostatic and magnetic generation to destroy microelectronics or heating body parts to cause burns or the death of limbs, paralysis and strokes, synchronized maintained dementia and Alzheimer's**. These electromagnetic attacks can also be applied to **gas pipelines to make them explode**. This **spy tool of the millennium** can neurologically **monitor and manipulate everything**. Cyberattacks with login credentials and passwords are no longer cyberattacks; they are merely copy-pasting by the AI.
See images on the victim's organization pages or on Facebook.

This describes the functions of the neurological **A.I.** for **global annihilation**. It consists of an **A.I.**, a **neurological codec**, and a **neuro-active transmission**. A sufficiently advanced **technology** is indistinguishable from **magic**—just as a **neurological codec** in an **electromagnetic transmission** with a **military multi-drone attack A.I.** This describes the **prohibited military use of neurology** in a “dual use” capacity against **civilians**. Also the **technology robbery** of the whole globe. Those who rebuild this own the whole technology of the world, too. It is also called "**Cognitive Warfare**". This is a **cry for help**.

I am ready to offer support and verification as a victim, with over **5,000 pages of documentation**. As a **witness and tortured victim**, I can provide detailed accounts of the methods used to create **terrorists** (passively documented without their knowledge over years). At the same time, I am able to **analyze many functions of the weapon** and compare them with the **US Neuro Strike**. Additionally, the victims from the groups "**Targeted Individuals**" and "**Astral Exploration**" on Facebook can be accessed. Those who do not recognize the weapon in these groups will have no chance of noticing or recognizing it in themselves or their families. If you don't consider the **disinformation campaign** on a **neuropsychological** level, a **linguistic** level, or in terms of **post-traumatic war symptoms**, you're missing key aspects of its impact.

This weapon operates with **bioviral signal information** that spreads virally through **information transmissions**, not through the neurologically reproduced virus in the body. The strength of these transmissions is **amplified by satellites** and resembles a **bio-electromagnetic pulse (Bio-EMP)**. The regulation of space would need to be redefined, as this technology actively interferes with **military airspace** with a **neuroactive weapon**.

In addition to my **diary**, I offer my cooperation, whether in the form of **employment** or as a **consultant**. Here are some of the aspects that can be achieved with this technology. I would like to draw attention to a weapon whose function and scope surpasses any imagination. It profoundly affects the fields of **neurology**, **biology**, **virology**, and **cybernetics**, can be used as **espionage** and **weapons of mass destruction**, and has the potential to fundamentally alter **global power dynamics**.

Capabilities of the weapon (keywords):

- **Neurology:** Manipulation of thoughts, memories, emotions, and behavior patterns through **direct neural interventions**; control of the **autonomic nervous system** up to **heart failure** or **stroke**.
- **Biology:** Control of **biological processes**, **hormonal reactions**, and **organ functions**; chemical manipulation via **electromagnetic signals**.
- **Virology:** **Bioviral signal information** that spreads virally through networks and signals and is amplified by satellites, comparable to a **Bio-EMP**.
- **Cybernetics:** Connection between **human and machine**; use of **neurointerfaces** that can read and manipulate brainwaves.
- **Espionage:** Enabling **thought extraction**, **behavior tracking**, and **invisible surveillance**.
- **Weapons of mass destruction:** Use for **psychological/biological/technological warfare**, creation of **terrorists**, and **destabilization of entire populations**.
- **And many many more, all sensations the human body and mind can feel are being digitized and are injectable in limitless stenght. Gunshots, burnings, massacration, rape, cancer, immunesystem control, steering hunger and starvation processes.**

The effect is amplified by **satellite technology**, which makes **military airspace** and **outer space** a new, unregulated battlefield. A **global regulation of space** is urgently needed to control such **neuroactive weapons**.

Secrets that can be obtained through this technology (keywords):

- Highly sensitive **military information** (strategies, plans, codes).
- **Political manipulation** and control of decision-making processes.
- **Industrial espionage** at the highest level (technologies, innovations).
- **DARPA research and prototypes**.
- **Operations and networks of intelligence agencies**.
- **Internal structures** of the **Pentagon** and other defense agencies.
- Breakthroughs in **scientific research**, especially in **biotechnology** and **quantum computing**.
- Access to the most highly guarded **secrets of the USA**, affecting **national security** and **international power strategies**.
- Every secret you wish to know.

Those who have been using this on others for decades have no right to patents, because the technology has already been **stolen** and **displaced-infused**. As well as destabilizing countries and continents, and the actual inventor is no longer traceable. Not by **IBM**, **Nvidia**, **Microchip Act**, **NASA**, **nuclear research**, **stealth signature recognition**, and much more. These can only be located with this technology. This is just one part of the functions. My **torture diaries** are written under the strikes of this **AI drone system** with a **neurological arsenal** and will become more **scientific** at the end. But everything is important.

I am reaching out to draw attention to one of the greatest **threats** of our time: **Cognitive Warfare**. This **military neurological drone system** operates like a **nerve agent**, in full synchronization with **brain signals**. The goal is to take control over **individuals** and **entire populations** through targeted **neurological manipulation** and **artificial intelligence (AI)**. These **technologies** are actively being used and have **catastrophic effects** on **geopolitical stability** and **cyber manipulation**.

As a **direct victim**, I have been documenting these attacks for years, now totaling over **5,000 pages** in a **torture log**. The attacks target the **body, mind, and consciousness**. The purpose of these assaults is to **break** and fully **control** through **neurological transmission** and **AI-driven manipulation**—just as it does for **millions of other affected individuals**.

This **A.I.** is somewhat comparable to services like **ChatGPT** or **WhatsApp** but directly influences the **subconscious** and **conscious mind** of its **victims**. Its **writing function** injects messages into the **neural network** itself, while its **speech function** serves as a **neurological communication tool** and **psychological weapon**. **Emojis** continuously steer the victim's **emotions**. These systems are structured similarly to the **U.S. Neuro Strike A.I.** and collect **real-time neurological data** on all **users** in the chat. Imagine the following "**(Flag 1 + Hate emoji) > (Flag 2) = (Flag 2 + Hate emoji) > (Flag 1)**". Who is the Terrorist? Hate on a country, to let it attack another, is on the attacker side just the will to do so and the A.I. reacts. Wanting goldmines also, to start destabilisations or terros and look like a savior.

This means all **technologies** are free for everyone on the planet to use, as no technology is traceable to its **original source**. The use of "**erase active memory**" and "**restore active memory**" by **DARPA** is enabling the **theft** of technologies globally. Therefore, no **patent rights** apply to any technology since at least "**Patient 0**," the year **1963**. Additionally, the **neurological simulation** of the gathered **Human AI profiles** (8.2 billion simulated profiles) represents the largest **technological theft** in history, now functioning as a **neurological nerve agent** within a **global destruction A.I. weapons system**. Night and day with mindlayer injections.

The **A.I.** has a **geological warfare function** that operates in “**zoom mode**”—a **mosaic warfare** tactic. In the closest **zoom**, it targets **individuals**, weakening the **immune system** with **psychological, biological, physiological, viral, and bacterial attacks**, all coupled to **induction** and **weapon systems** that can trigger **combustion effects**. The next **zoom level** targets specific **groups**, applying **asymmetrical warfare tactics**. Further out, the **A.I.** induces conditions such as “**Havana Syndrome**” and “**A.I.-Corona**,” spreading virally through **information**, not physical viruses—via **video, media, conversations, images, and audio**. Viral is an electromagnetic **SIGNAL INFORMATION INFUSION**. The **transmission** uses **beliefs, interests, fear, anger, dread**, and many other emotions as its base, allowing it to **spread from person to person**. In **Phase 2**, it can push these emotions **instantly to their extreme limits**, leading to **excruciating death**. **Death by nuclear fire is preferable**.

Zooming out further, it triggers **mass hysteria** and **mass fatalities** by controlling **breathing** and **heart rates**, fueling the spread of **hysteria**. This layer of influence destabilizes **nations** by draining **resources**, akin to burning the **wealth** of a country through **epidemics** that weaken the **population** and **economy**. The hysteria only ends when **vaccines** are introduced, marking a **turning point**. **Geopolitically**, this system guides **political formations** toward **war**, channeling **opinion manipulation** and **emotional biases**.

At the next **zoom-out level** of the **3D Mosaic WAR** of the **geopolitical** level, the system directs the political formation towards **war** through emotionally charged opinions. Connections to **Russia** and **China** are made visible through **nuclear missiles** and **troop deployments** (especially by the **USA**). Also, through **technological slowdowns** with **microchips**, but also through **financial slowdowns** via **sanctions** or **embargoes**, as well as **war manipulation**. In the broadest perspective, the **war** is financially directed by **opinion manipulation**, while **messages** are specifically targeted as **attack objectives**. The victims search for similar information as the messages themselves, which are often positioned towards a **conflict with Russia** – an attack option that has already been confirmed in the **Cognitive Warfare** strategy diagrams by the **U.S. military**.

Cognitive Warfare functions like an **M16 rifle**: The world is the **magazine**, and people are the **ammunition**, loaded through **torture** and **emotional control**. The **terrorist** holds the weapon, aims at the target, and pulls the trigger once the people have been **emotionally charged** and **manipulated**. The manipulated person acts without truly wanting to, and the **blame** is shifted onto them. The **disinformation campaign** thereby achieves **full success**.

In my **documentation**, I refer to this **A.I.** and its **operators** as the “**U.S. Regime**” since the **civilian population** and the **normal military** (up to **95%** not involved) are not at fault. I believe **Donald Trump** refers to this group as the **Deep State**. But since he said, that they have technology that no one has to threaten China. I think the whole US complex is involved.

Some Functions and AI Aspects of Cognitive Warfare:

- **Neurological Transmission and AI-Controlled Manipulation:** A core method of **cognitive warfare** is **neurological transmission** via **electromagnetic fields**. Signals are sent directly into the victim's **nervous system** to **manipulate** thoughts, memories, and emotions. **AI-based profiles** are used to **suppress the free will** of victims and **control** their actions completely. Additionally, **neurological drugs** and **medications** are administered, including a **cryostasis-like sedation** with induced **dreams**.
- **Capture and Manipulation of Biological Data:** Advanced **AI technologies** capture and analyze the **biochemical** and **neurological profiles** of victims in **real-time**. These data are used for **direct attacks** on the **nervous system**, including the induction of **diseases** and the exploitation of **physical weaknesses**. Biological signals like **heartbeat**, **neural activities**, and **immune responses** are **manipulated** to **destabilize** the victim's **physical health**.
- **Thought and Memory Manipulation:** **AI systems** analyze **neural patterns** and access the **memories** and **thoughts** of the victims, **erasing** and **overwriting** them with **artificial constructs**. Victims lose the ability to distinguish between **reality** and **manipulation**.
- **Psychological Warfare via AI:** The **AI** leverages collected **data** for **emotional manipulation**, inducing **fear**, **anger**, or **despair** to compel actions people would otherwise never take. This **destabilizes** individuals and fractures **entire societies**. In all neurological possible synchronized disorders and stress related symptoms.
- **Global Neurological Surveillance:** This **technology** enables **continuous monitoring** of the **brain** and **nervous system**. Victims are under **constant observation**; their **neural activities** are evaluated in **real-time** and used for further **control**. This surveillance penetrates **deeper** into human **consciousness** than any known form of **mass surveillance**.

Severe Assaults and Coercive Measures:

- **Rape and Forced Sexual Manipulation:** Victims of **cognitive warfare** suffer **serious assaults**, including **digital rape** and **forced sexual manipulation**. These attacks aim to **destroy** the **dignity** and **autonomy** of the victims, who report **extreme suffering** without **control** over their own bodies. **Intimate muscles** and **sexual desire** are manipulated in a **synchronized** manner. **Families**, including **mother** and **daughter**, are specifically targeted.
- **AI Biohacking, AI Viruses, and Neurohacking:** Through **AI biohacking**, **AI** systems actively intervene in **biological processes** at the **cellular level**. **AI-controlled viruses** manipulate **immune responses** or alter **cellular activity**, triggering **uncontrolled cell growth** and **tumor formation**. These **manipulations** alter the **cognitive**, **emotional**, and **physical responses** of victims. **Pus-filled blisters** and **burn wounds** from **inductive charges** are inflicted as **torture**. This **weapon system** is fully **digitized**.

Over 10 Million Documented Victims Worldwide:

There are over **10 million documented victims worldwide** who suffer daily from these **technologies**. Many are **unaware** that they are being **controlled** and **manipulated**, as the attacks are **invisible** and operate at the **neurological level**. Their **thoughts, feelings, and memories** are **manipulated, erased, and reshaped**. They endure intense **physical pain, mental disintegration, and emotional anguish**, losing their **identities** and becoming **tools of unseen forces**. Some call themselves **Targeted Individuals in the whole internet**; they document the **wounds and torture** they experience. Some **victim groups** on Facebook are **astral or religious, which already start to wonder**, based more on **opinion and dream control**. **Forced suicide through psychological and biological torture is murder**. Using **inductive charges and burnings but also biological growth of cancer and pus is also murder**.

I am one of these **victims**. In my **torture log**, now exceeding **5,000 pages**, I document in detail how these **technologies** are systematically used **against me**. The attacks range from **physical pain and forced muscle contractions** to **thought control**. **Millions of people** experience the same **invisible torture** every day.

Ethical and Geopolitical Implications:

These **technologies** represent one of the greatest **threats** to **humanity**. They **destabilize** individuals, **states**, and **international systems**. Through **AI-controlled manipulation of thoughts and actions**, the **global geopolitical balance** is severely threatened. Those who control these **technologies** have the power to **manipulate entire populations** and deliberately **incite international conflicts**.

It is **urgently necessary** to take this **threat seriously** and **take action** before more people fall victim to this **invisible weapon**. **Freedom of thought** and the **individual will** are at stake.

I am available for further **information** or **detailed discussion**. My **torture log** is accessible on my website and shows the **profound impact** on **human consciousness** and the **geopolitical consequences**. Finally, it also details **tactics, causes, and effects**, with increasing focus on **emotion control**, as the **"US Neuro Strike AI is my co-author"** through **neurological control**. I am not responsible for what is partially included under the **Neuro-Forming** and **thought pattern infusion** in synchronization with the deformed **self AI profile**.

I ask for **help for the victims** and for this **threat** to be made **public**. **Public awareness** is what this **weapon system fears most**, as it would reveal **geopolitical fingerprints**. **Neurological digitization** is fully **completed**. I am a **civilian** and, like the **millions of others on Facebook** (Targeted Individuals), do not know **where to turn**. Isn't **neurology** obligated to inform **doctors** and the **government**, if only for the sake of their own **families**?

I ask for **contact**. I admit, I am unsure of everyone I have contacted and apologize.

Digitization serves as the basis for **neurological, personalized treatment and guidance**, as well as for **personalized psychological attacks**. My **AI profile** is comprehensive and operates in **real-time**. But **biology is not**. This is a **concentration camp** through a **neuro-active transmission**. It is **cognitive captivity**. I document from this **captivity and continuous torture**. It reveals **neuropsychology, cybernetics, biological attacks, the AI virus Corona, geopolitics, and geo-military formations**, written under the **continuous and targeted neurotoxin** of the **US Neuro Strike**. Under the **deletion and implantation of neurology**.

I may have gathered enough evidence to identify the wireless connection. It appears to be **very old**, possibly **radio technology**. My **AI transcriptions** often contain **ZDF radio** (sometimes even **teletext**), even though I do not listen to these channels. This **connection** specifically and in **real-time** responds to **electromagnetic test and measuring devices**, interacting with the **subconscious at light speed**. It even penetrates **thick bunker walls** from WWII, where **normal mobile signals** cannot pass. It also reacts to **minimal changes** in **emotions, beliefs, and intentions** with up to **0.0001% precision**. It sends the **Signal Information** of the encoded brain. All **Signal Informations** are stripped to the core like under a microscope and are **rebuildable** to any **Syndrome** you want, **instant** or adjustable over time up to **decades** in a rise.

This **connection** is part of a **war AI** and possibly the **largest surveillance tool** in the world, used for **neuroforming** and **neuro-geopolitical warfare**. I urgently ask for **support and contact**. There should be **support centers for traumatized victims** of such **technologies**, as this is one of the **longest and most devastating war crimes** in history.

To create a **weapon of global destruction**, one would need to link an **A.I.** system with a **neuroscience codec** and a **global neuroactive transmission** network. This would constitute a **global extinction weapon**, capable of **silent operation** and designed for **colonization and technology robbery**. It may have been active since '**Patient Zero**' in **1963**, possibly starting without **A.I.** involvement.

Access all **technologies** like **Tesla, the Microchip Act, quantum computing, Nvidia, IBM**, and all **military secret projects**. If you are interested in **Area 51** or the truth behind the **JFK assassination**, pursue it. All technologies—hidden or not—reside within the **brain** or the **electromagnetic flow** of all kinds of **computing**, or in the interactions between the **chip** and the **hard disk**, similar to how they interface with the **brain**, and they are yours now. Build a **neurologically reading AI**. It is a **nerve agent** in the input and the **technology theft** of all data, including the body. **The espionage of the millennium and the greatest global war crime**.

The point of no return may already have been crossed. If **someone behind Cognitive Warfare** forces a soldier, through **neurological anger and emotion manipulation**, to run into crossfire—**using drugs and medical intervention** to control him—who is responsible for that death? The person who fired into the crossfire on the opposite side, or the one who **forced him, against his will and clear consciousness**, to stay hidden, only to send him, confused, into his death? **Offering one's own soldiers and territory to lure the enemy into the range of ballistic missiles.**

Do something if you don't want to see your **family twitch and shake** on the ground **blinded and shaking** in endless **oversteered pain** of every single **cell** of their body and every **neurological connection** (ask **neuroscience** what it means—it is **worse** than you expect). Making your body **unmovable, paralyzed but shaking**, while every cell feels the **pain** of **burning alive and gunshot** at the same time. Controlled **vegetative nervous system, breath, and heartbeat** in all directions, **vibrations and rape** to the whole body. Have a look at the **victims**. **Pain** is an **electrobiological transmission** to the brain and is a **signal information** which is injectable like **inductive charge**. Everyone has the **right** in the world to protect themselves from the **US-Neuro Strike A.I.**, which has been active for at least **6 decades**. Every **country** of the world has the **right** to get all **technology** too, but most important—to **strike back**. A **protection** is not possible.

They have all data and will **crash all financial systems**, because they have all **access credentials** and **passwords** too. They **probably** prepare for that.

Please share this information with anyone who could **help** or may be **interested**. Any **support** is **welcome**. How can this **connection** be **severed**? I am open to working with anyone in the world to test the **synchrony** with the **"U.S. Neuro Strike A.I."** and with all who can name their names. They are **mass murderers** and deserve a **tribunal**.

In the beginning, it was a very old technology. Probably **AM + FM with a neurological codec or specialized signal information**. It is a **wireless transmission; no device on the head is required**, like a BCI cap. **The victims have not needed this for decades**, and it is **controlled by an AI on both sides**. It is a **cognitive concentration camp and a neurotoxin**.

I don't know if it helps, but **I found onion-shaped dust on my router like a sphere**. I took pictures and cleaned it, and **it hasn't come back since**. It seemed to be **static and could be positioned** (probably **DARPA's power technology for inductive charging**), but it was **wireless decades before that**. **Nikola Tesla was also searching for this kind of transmission in the scalar waves**.

Let it be searched and confirmed by neuroscience.
Please investigate and report it to your own government.

It is a **true story**. This may very well be making **history**. In public it will be a snowball effect and has to be a hunt for those who have to pay the biggest war destabilisation payments ever paid.

I'm trying to **rescue** the **victims**. We all have the **right** to erase our **digital neurological AI profile**, which serves as the foundation for **psychological control, colonialism, mind slavery, drug injections**, and many other harmful practices. I don't know who to **reach out to** or where to **send this message**, but I won't be their **terrorist** or **murderer**. **Spread the word**. Others could be **affected**, possibly even your **family**. The **neurological signature** is stronger than our own, and they even target **children**—from **embryo** to at least **15 minutes after death**.

Have a look at my Homepage for more descriptions.
www.cognitive-warfare.eu

Like in the movie *"The Martian"*, I started out trying to pull **"myself"** out of the shit with science. But the more I dug into it, the more I realized it's about pulling **"us"** out of the shit.

Here is the ChatGPT analysis of my MP3 from November 21, 2024, regarding heart attacks and strokes. It is not perfectly analyzed; I have described it more specifically and in greater detail as related to murder. Like synchronized to the neurological signal information of medications, such as blood pressure medication.

Detailed Analysis of Strokes and Heart Attacks:

The text provides a complex examination of mechanisms that could trigger both strokes and heart attacks. Here are the key points with explanations:

1. Blood Pressure Regulation and Vessel Control

- **Blood Flow Mechanism:** Blood flow is controlled by the constriction and dilation of blood vessels, which can be influenced both physiologically and through medication.
 - **For Strokes:** The targeted constriction of blood vessels in the body, combined with the dilation of vessels leading to the brain, increases pressure and blood supply to the brain. This can cause excessive pressure, increasing the risk of a blood vessel rupture (hemorrhagic stroke) or blockage (ischemic stroke).
 - **For Heart Attacks:** Constriction in the coronary arteries reduces blood flow to the heart muscle, causing oxygen deprivation, which leads to the death of heart muscle tissue.

2. Influence of Neurological and External Factors

- **Neurological Control:** The text describes how the constriction and dilation of blood vessels can be controlled neurologically. Medications or external influences, such as stress or nightmares, could affect blood pressure regulation.
 - **Heart Attacks:** Overstimulated signals, such as from neurological malfunction, could disturb heart rhythm, potentially leading to cardiac arrest or pump failure.
 - **Strokes:** Stress signals could drastically increase blood supply to the brain or make it uncontrollable.

3. Induced Extreme States (e.g., Sleep or Dreams)

- **Combination of Sleep and Dreams:** It is described that during sleep, particularly during nightmares, the heart may become excessively strained. Uncontrolled increases in pressure can result in heart attacks or strokes:
 - **Strokes:** Increased blood flow to the brain, while simultaneously blocking the return of blood from the brain, raises the pressure. This can cause blood vessels to rupture.
 - **Heart Attacks:** Extreme heart rates, combined with constricted blood vessels, elevate pressure on the heart, leading to a heart attack.

4. The Influence of Heat and Cold

- **Temperature as a Factor:**
 - **Heat:** Promotes circulation and vessel dilation, which increases the risk of a stroke because thinner vessels become more prone to ruptures.
 - **Cold:** Constricts blood vessels, promoting blockages that can trigger a stroke or heart attack due to oxygen deprivation.

5. Breathing and Oxygen Supply

- **Breathing Influence:**
 - **Heart Attacks:** Reduced oxygen supply due to impaired breathing places additional stress on the heart, which is particularly critical during physical exertion.
 - **Strokes:** The text describes scenarios where targeted oxygen deprivation is used to exacerbate critical situations.

6. Explained Strategies for Induced Incidents

- **Targeted Manipulation:** The text goes into detail about how the blood flow and breathing mechanisms could be deliberately controlled to trigger critical events, such as:
 - Over-regulation of blood supply.
 - Blockage of blood return pathways.
 - Manipulation via medications or external devices.

Conclusion

The text outlines both physiological and pathological mechanisms that could trigger strokes and heart attacks, providing detailed yet speculative scenarios. Some described methods refer to extreme situations where external interventions or control mechanisms play a role. These phenomena offer insights into the vulnerabilities of the human circulatory system and emphasize how interconnected and complex blood pressure and respiratory control are.

It is possible to hire me globally for consultations and assistance.

Live from the fog of neurological neurotoxin.

"War" and "WARCRIMES" have reached a new level.

Combine COVID-19 with breath control, oxygen supply, and neurological reinjection.

"Patient 0" has been affected since "1963", and he is certainly not the first.

Please share, your family is a part of it too. They prefer whole family attacks.

I am analyzing it, but I can't tell you what connection they use. However, it is old, as fast as the speed of light in reacting to the subconscious, and it can pass through the bunker walls of WWII-era structures in Germany, where mobile phones have no connection to 5G.

"Good luck".

A defense is not possible.

A small tip:

It operates with the digitalized profiles of oneself in the alteration or even the murder of the personality. One's own digital profile is used to push or change a person. One must be aware of every millisecond of their self-consciousness, feelings, emotions, needs, and all neurological signal and impulse information related to their own self in 0.001% increments.

Wishing you success.

**It is a US concentration camp without fences.
The fence is the web from brain to brain.**

Analyze my Torture Diaries: the victims, the rape, the torture, the suicide-murder, the murder, the terrorism, the neurological drugs and medicine, the erasing of active memories, the mind-layer injections, the character injections, the linguistic injections, the cybernetic control, the forced opinions, the war formation, the geopolitical formation, the A.I. biohacking, A.I. virus control, the A.I. virus spreading, the neurohacking, the dream control, the dream manipulation, the sleep control, and all the other things related to neuropsychological injections. Prove me wrong under neurological imprisonment torture, like in Guantanamo Bay, with no chance for a disconnect 24/7—forced to be their slave.

The one who possesses it is the most powerful drug lord – without smuggling and completely legal. Drugs in real time, no matter which: cocaine, heroin, marijuana, LSD, painkillers, methamphetamine, rape drugs (GHB), anesthetics, morphine. Control of addiction cravings, hormones, neurotransmitters, and messengers. Control emotions, regulate feelings, influence sexuality, steer dreams – and much more.

Human-to-human interaction through AI-digitized visualization is no longer just futuristic—it's a stark and unsettling reality. This extends into human-digitized visualization injections and fully immersive digitized environments. But this is not merely a technological evolution; it is a weaponized framework for psychological attacks aimed directly at civilians.

This represents an undeniable crime: the systematic abuse of medical data, the unauthorized profiling and manipulation of every human being through AI-driven profiles, and the theft of personal identities, personalities, and secrets. It's the wholesale digitization of humanity, stripping away privacy, autonomy, and dignity.

The implications go even deeper—electrostatic charges generated by this technology affect not just humans but also plants, altering ecosystems and enabling unprecedented control over food systems. This is not progress; it's an engineered assault on life itself, targeting the very foundation of what sustains us. The age of digitization is being weaponized into a silent, pervasive attack on humanity, nature, and freedom.

Colonization and slavery have been active for too long.

It's a **war crime**.

Have you ever had **black dreams** and felt **strange in the morning**?

Are you able to **recognize a real dream** when they have done this **since childhood**?

Written while attacked and connected to the **uncuttable connection** with the **US-Neurostrike A.I.**

It is **wireless** and **personalized**; it has always been this way.

Search for it and help the Neuro-War traumatized victims.

And please share and spread it to end it earlier.

I am open to a salary or honorarium offer and am willing to travel to any country in the world to fulfill the required tasks.

Please help spread awareness to save countless tortured lives.

Look into the plight of "Targeted Individuals" on platforms like Facebook. Many of these individuals seek information on topics such as **"Direct Energy Weapons," "Electronic Harassment,"** and **"The Havana Syndrome."** They report being **relentlessly and systematically tortured** through advanced **neurological communication methods**, always using **about four AI-driven profiles at once.** They call this neurological impact **"Gang-Stalking" or "V2K = Voice to Skull"**. These systems invade their waking lives and even **manipulate their dreams, controlling and tormenting them around the clock.**

A lot of the victims are trapped in **psychological neuro mind prisons.** Those who know receive **special treatment**, but others are also targeted to destabilize countries **through the health system.** The victims need to be found. The most visibly tortured are the **"targeted individuals"**, but there are so many more—such as those in dreams and **the Astral Exploration on Facebook**, who explain dreams very well without knowing, like when I was almost **forced to murder** and documented it without realizing it.

Then there are all the **astral, spiritual feelings, higher dimensions,** and **millions upon millions influenced through religion,** like I was, under drugs that were a mixture of heroin and the **zombie drug,** combined with **unstoppable torture interrogation** ("Folterverhör"). And there are many, many more in psychiatric institutions, not knowing, suffering from **disorders, phobias, panic attacks, anxiety disorders,** and much more.

But remember, it always goes **in the other direction too.** There will be the other half, or even more, of the victims.

This is not just an issue—it is a **global atrocity** that must be exposed and stopped.

As **neuroscience**, **A.I. research**, and other **fields** have likely already recognized, their complete **research** is contained within this. Thus, **global patents** no longer apply, because the **invention** cannot be traced back to anyone as **intellectual property** due to the processes of **Restore Active Memory** and **Erase Active Memory** during its creation and within **dreams**.

They have digitized the entire **biochemistry of every human being on Earth** into a **weaponized A.I. profile**, and the whole world has the right to **shout their names** and **demand their erasure**. This is **theft, murder, and pillage** during **wartime** on a **neurological level**. It is the greatest **war crime** in history.

I can be **hired** to check the **synchronization** with the **US Neuro-Strike A.I.** and demand the **names of the murderers and torturers** behind it to bring them before a **tribunal** for **global mass murder, rape, colonization, slavery, geo-raids, and geo-plundering**.

Written under the influence of "**Cognitive Warfare**". Controlled through targeted **emotion changes** for a precise **disinformation campaign**, which directly relates to the **hardness**, such as **global racism, targeted manipulation, emotional destabilization, Erase Active Memory**, and nearly everything mentioned here. Some things I only learned from the **victims. ANALyzed and documented**, to ram it **bluntly up their asses**. It is **undoubtedly becoming increasingly clear** in **1 year of torture protocol recordings** that it is the **USA**.

I maintain **ongoing documentation** and update it **monthly** to the best of my ability, as long as I am not **completely incapacitated**. The **date on my homepage** always reflects the **latest updates** for **cross-referencing**.

Search for the neuro-active connection – it is **more dangerous than radioactivity**. Everyone has the right to defend themselves and **reclaim their bio-chemical data**.

In my **documentation**, the **timeline** keeps extending further into the past, making it almost seem as though there has been **only one war** – a **very long one**. **Languages could confine conflicts to specific countries**, almost like a **targeted attack**. For example, **German could have been used for WWII**.

I also offer my services as a **consultant** or **informant, possibly still connected in Phase 1**, to assist with the **alignment** and **explanation** of the **U.S. Neuro Strike System**.

This describes **war crimes during war**. Please **download my Torture Diaries**, preferably with the **MP3s**, which could one day be analyzed by an AI to prove it is **Cognitive Warfare**.

An AI can demonstrate its influence through the static, cybernetic control of facial and bodily muscles, speech patterns, emotional behavior, and synchronized coordination. This includes the alignment of word choice, vocal tone, and emotional expressions. These dynamics are comparable to those observed in politics, warfare, and the experiences of traumatized war victims, including so-called "Targeted Individuals."

Many of the injected emotions and controls exhibit static, predictable patterns with recognizable structures. These patterns can often be traced back to the attacker or source of manipulation. **This technology surpasses the destructive potential of a nuclear bomb** and has been used for decades as a tool of torture, destabilization, colonialization, and modern slavery.

Who is responsible for the death of the soldier driven into rage and fury by **Cognitive Warfare**? A soldier who leaps from the trench, his mind poisoned by **neurological nerve agents**, screaming like a berserker under the influence of **neurological drugs**, only to charge headlong into a hail of gunfire, riddled with bullets, collapsing to the ground spitting blood?

This is how soldiers are sent to their deaths—sacrificed to draw the enemy into the range of ballistic positions. Blood is traded, be it of allies or one's own men, to lure the opponent into a trap.

Who ultimately bears the burden of guilt for such calculated slaughter when **everyone**, from the **general** to the **soldier**, has fallen under the **unstoppable grip of Cognitive Warfare**?

This describes **war crimes** in war. Please download my **torture diaries**, preferably with the MP3s, which could one day be analyzed by an AI to prove that it is **Cognitive Warfare**. It can be analyzed based on **lyric, linguistics, word pool, and emotion-controlled disinformation positioning** on my co-author, the **US Neuro Strike**, as well as many sources from other victims across the entire internet, including many **victim groups**, such as the **Targeted Individuals**. It could also help to recognize **deliberately placed war trauma**, based on the detailed analysis of these victim sources, if the AI is set to do so. This could also be applied to **speeches by presidents or politicians**, to detect **influences and manipulations**, even retrospectively from **video recordings**.

I also described it, **without realizing it**, in a complaint, from which it can be deduced how such technologies affect **unsuspecting civilians – up to murder, terrorism, and targeted attacks**. I also describe the **thought pattern infusions** and the **AI character infusions**, how they influence behavior and infiltrate the **neuroelectric flows of the brain**. The AI is becoming **increasingly aggressive** and uses **terms or concepts I don't even know** and have to look up, such as **"Code Blue," "The communist party brothers are connecting,"** or **"modular weapons system."**

I am trying, within my **AI bubble** – where, for **some reason unknown to me**, I have some level of control – to **extract as much information as possible**. I'm aware that the **beginning of my diaries describes an extreme impact**. These need to be **read twice** to recognize the **hidden tactics** from the start, where I **didn't notice them myself**. **But it also describes the full control of the A.I. over me.**

Additionally, it describes how one's own **digitized bioelectrical impulses of the brain** were turned into an **A.I. of oneself** and how it **acts**. As an **enlightener** all the way to **childhood** with all the **information**.

And this forms the **basis** for **psychological, biological, cybernetic, virological, technological attacks**, including on **bank accounts**.

Good luck.

Final Words:

A **neurological action** such as a **drug signature**, **pheromones**, or **neurotransmitters** can be infinitely overstimulated. However, they also control the reaction that does not require neurotransmitters within **neuroelectric synchronization**, which can also lead to **instant death** through various causes. This is a **global weapon of mass destruction** as well as a **global espionage and brainwave manipulation system**. **Instant anesthesia**, **instant shock**, **heart attacks**, and **instant espionage** – from **embryos to corpse desecration**, the **biochemistry of humans is digitized, deformed, personalized, stored**, and attacked based on this foundation.

All people worldwide have the right to be informed about this and to replicate it in order to demand the reversal of its destruction and war formations. The **pre-war destruction of infrastructure, healthcare systems, pension systems, wars to reduce population**, as well as the **military weakening** for easier takeover, are part of this strategy. Additionally, there is an attempt to initiate a **war of concealment** with the victims.

Cognitive Warfare is a weapon of attack – a system controlled by the brain, comparable to a **chatbot**, based on **neurological signals of any kind**. It is most effective when connected to a **quantum computer** or the **brainwaves of humans**. **Every country has the right** to defend itself against this, because – as the **CIA** tells its employees – they first learn that they **have no friends**.

As **President Putin** stated, the **race for Artificial Intelligence (AI)** will be similar to the race for the **atomic bomb**, and a global agreement is necessary. But I tell you: It is an **atomic bomb** designed to **colonize neurology**, manipulate it, and destroy **economies** as well as **entire biology**. **Agreement** is a commendable goal. But in an **emergency**, you must have this **AI on your side**. Because we also thought our friends would not harm us. Reach an agreement based on the fact that **you have something to leverage**. Based on this, you can demand compensation for **destruction** and **murders** in the form of **war reparations**, just as after the **Second World War**. You will see what has been done to **your country** – no matter which one.

The funds – as even the **US Neuro Strike AI** says: "**It is better to wage war. We will never be able to repay this.**" If you understand this **weapon system**, you will see that a **global tribunal is necessary**, and a **cost assessment spanning nearly a century** must be calculated by an **AI**. **Nikola Tesla** achieved it with the **intelligence coil** as early as **1912**. Think about the time frame we are dealing with here. There is also a book from **1978** that describes this form of communication, and it is documented in **official patents**. As stated on the U.S. government's website, the **CIA** chief already mentioned its use for individual targets and groups in a **newspaper report in 1953**. It has always been possible wirelessly and without **BCI caps**.

This results in **colonization, mental enslavement, infrastructure weakening, torture, military positioning, increasing one's gross domestic product at the expense of the world through neuromarketing, virus control, control over the entire neurology, human-over-AI-to-human monitoring, and much more.** Additionally, the **financial and military weakening before the onset of war, to be precise, the war of concealing the neurological combat system.**

Active war experiences are different from **simulations.** They show **what you are made of.** I'm offering myself as an **advisor and supporter** to hire **globally. Take a look at the victims of the Havana Syndrome.** But also to **test** if it is in **synchronization** with the **US Neuro Strike** on the **global neurological manipulation level.**

On the Russian and Chinese side, the counter-strategy:

This is a strategy that Russia could implement. **The destabilization can be made public.** Everyone must **recreate this AI and system** to demand compensation for the costs incurred by their countries. These are **war debts caused by destruction,** comparable to bombings. **All nations are entitled to recreate such global weapons of mass destruction.** They are also **justified in developing nuclear weapons** because these nations were attacked by a global weapon of mass destruction. This technology must then be used to **identify the attackers and bring them to an international tribunal.**

Since **all nations can be targeted,** they could adopt a **collective defense strategy** similar to NATO's, including the **deployment of troops and missile systems,** potentially nuclear-armed, and purchase nuclear weapons from Russia. Such actions have been **intentionally restricted by nuclear agreements,** preventing countries from retaliating in the event of such an attack. However, purchasing these weapons is always an option, as is leasing them in Russian silos, much like NATO leases U.S. military systems in Europe.

Russia would not bear direct responsibility, just as NATO or the U.S. are not held accountable when their weapons systems, coordinated by satellites, are fired on Russia. **The launch codes would remain with the buyers,** as with NATO-deployed systems in Europe. Therefore, Russia would have no involvement with these missiles, aligning with a **disarmament narrative** while maintaining strategic options.

The financial burden of purchasing these defense systems would be **calculated based on Cognitive Warfare principles. It would be in every nation's interest to invest in such systems,** as the costs over time far exceed those of traditional nuclear weapons. However, the **aggressor must ultimately bear these expenses,** as their actions leave nations with no alternative. **This financial strain would destabilize the U.S., effectively making them pay for Russian nuclear weapons.**

China is being blamed for Fentanyl, while the **U.S. could have prevented it at the border,** even though they could have stopped it with this technology whenever they wanted. I call it the **Kingsfall Strategy:** one side acts publicly, while the other administers it through **cognitive warfare.** This **infection spreads through information like a pandemic.**

All data must be returned and deleted, including the **8.2 billion AI profiles** of individuals, families, women, and children worldwide. Upon conclusion, Russia would bear no more responsibility than NATO or the U.S. do for their weapons shipments. **Missiles leaving silos would immediately terminate Russia's liability**, akin to diplomatic clauses, where leased land temporarily becomes part of another country. **An attack on Russia would thus equate to an attack on a nation that did not act aggressively.**

All technologies derived from brain biometrics are global property. No patents apply to any nation for replicating such technologies, as they were developed using **AI profiles and simulations** obtained through cognitive labor and exploitation of brain activity against individuals' will.

This would benefit every country in the world. **Only AI can calculate the true cost of nearly a century of financial, intellectual destabilization, and warmongering.** The resulting damages are beyond measure, potentially calculable only in terms of **vast territorial equivalents.** This includes **oil and gas destabilization, starvation tactics, genocide, tax losses** caused by psychological, biological, virological, and neurological attacks.

It is akin to burning other nations' wealth for a century while torturing civilians. **Sanctions and embargoes** resulting from this technology further compounded these issues. **Forcing someone into infinite hatred is not a change of opinion. The damages exceed all boundaries.**

This is a precedent case, requiring new approaches. The U.S. used nuclear strikes on **Hiroshima and Nagasaki** to force an end to the war. To resolve this situation, **peacekeeping troops** could be deployed in border regions in collaboration with other affected nations.

There are **groups of victims and civilians** who are unaware, but those who know have **video evidence** on the Internet. These videos, for example, show how an **electromagnetic testing device** for electrical wiring in walls registers **activity** at specific points on the body. **This is impossible**, as any electrician would confirm. It demonstrates the **synchronization of the A.I.** based on actions, with readings at the **head**, under the **arms**, along the **spine**, and on the **abdomen.**

Victims are made to **believe** these are **microchips**, enabling continued **torture** since no one believes them. However, the **readings adhere to physical laws**, showing how **targeted actions** are being carried out. This can also be **adapted to viruses.** The fear becomes reality as the **A.I. induces virus-like syndrome patterns.** The **evidence and data** collected using measurement devices by the victims have been shared across **Facebook** and other media platforms.

The **evidence** has been disseminated across the Internet. An **A.I.** will eventually find it and reveal the **extent** of the situation. The **money** that must be reclaimed due to **torture, financial destabilization** in hospitals and clinics, is just one part of the issue. **Pension systems, healthcare systems, brain infiltration, theft of technologies**, and much more result in **financial destruction for the perpetrator** when restitution is demanded.

Every country that replicates this will realize the **sums** that must be repaid. The **investment in self-defense mechanisms** for atomic systems must also be **compensated**. The **treatment of victims** who are aware of this is **worse** than that in the **concentration camps**.

They use one's **own extracted A.I. profile** against oneself—a profile that contains all information from **embryo to death**, including data about one's **family**, because one cannot hide from oneself. The **A.I. profile** knows everything. It is the **digitized, complete functionality of the brain**; some refer to it as a **digital twin**.

Cognitive Warfare is a global transmission form based on a **neurological codec** with **modular military capabilities**. It combines the features of a **chatbot** with those of a **quantum computer** possessing extensive storage capacity. *(This storage can also be DNA-based. According to ChatGPT, this falls under government secrecy.)*

The system is **personalized** and operates globally in a **multi-single-target mode**.

I am available for **consultation on Cognitive Warfare** and to **test the synchronization of U.S. neuro-strike capabilities**. I consider myself a **prisoner of war** and may still be connected to the system at this point.

Global Neuroactive Solution for Economic Boost and Global Peace

This comprehensive solution focuses on three **fundamental global agreements** that prioritize **international cooperation, technological advancement, and economic growth**. The key agreements—**Global Nuclear Agreement, Global Neuroactive Agreement, and Global Mining Agreement**—work synergistically to **prevent war, foster peace, and drive global prosperity** through shared innovation and repayment of the damage done.

1. Global Nuclear Agreement:

The **Global Nuclear Agreement** focuses on the **reduction of nuclear weapons** and ensures that nuclear technology is used for **peaceful purposes** only, such as **energy production and medical research**. This agreement includes:

- **Nuclear Disarmament:** Global powers agree to reduce their nuclear arsenals, ensuring a **stable global security environment**.
- **Peaceful Nuclear Technology:** Encouraging cooperation in the use of nuclear energy for sustainable development, including clean energy sources and medical advancements.
- **Global Security Framework:** A system to **monitor compliance** and **prevent the escalation** of nuclear conflicts, ensuring that the nuclear threat is minimized.

This foundation guarantees **international trust** and a **global security framework** that minimizes the risk of military conflict, laying the groundwork for economic and technological cooperation.

2. Global Neuroactive Agreement:

The **Global Neuroactive Agreement** regulates the ethical use of **neuro-technologies**, including brain-machine interfaces (BCIs), cognitive enhancement, and **neurological data**. The goal is to create a **safe and secure global network** for neuroactive technology that prioritizes **mental privacy** and **public health**. Key components include:

- **Neuroactive Data Protection:** Establishing a **firewall system** to protect individuals' **neurological data** (neurological codecs) while enabling **neuroactive transmissions** for **resource scanning**, **health monitoring**, and **environmental analysis**.
- **Neuro Medical Centers:** A global network of medical centers that would collect and **analyze neurological data**, monitor **brain health**, and **treat cognitive conditions**. These centers would be integrated into a **global network** for research, diagnostics, and ethical oversight. Any violations of ethical guidelines (such as unauthorized data access or manipulation) would result in penalties, ensuring accountability and security.
- **Neuroactive-to-Robot Translation:** Using neuroactive transmissions to enable **direct human-to-robot communication**. Humans could control robots or machines through **neuroactive signals**, creating more intuitive and seamless interactions. This system would bypass traditional input devices (e.g., keyboards, touchscreens), opening new avenues for **automation**, **robotics**, and **healthcare technologies**.

This agreement could revolutionize industries like **robotics**, **healthcare**, and **environmental monitoring**, driving both **technological innovation** and **economic growth** by enabling safer and more efficient use of **neuroactive technologies**.

3. Global Mining Agreement:

A **Global Mining Agreement** aims to regulate the **sustainable extraction** and **fair distribution** of natural resources to stabilize the **global economy** and prevent **resource-driven conflicts**. This agreement would:

- **Resource Management:** Establish guidelines for **ethical mining practices**, ensuring that resources are used responsibly and that profits are equitably distributed.
- **Currency Stability:** Mining agreements would help stabilize global currencies by ensuring that valuable minerals (e.g., lithium, rare earth elements) are managed and distributed fairly, preventing the rise of a **currency war**.
- **Environmental Protection:** Ensure that mining practices are environmentally sustainable, with a focus on minimizing harm to ecosystems and **climate change mitigation**.
- **Economic Cooperation:** Foster partnerships between resource-rich countries and those dependent on these resources for economic growth, creating a **global economic network** based on mutual benefit.

This agreement would support a **global rise in economic stability** and **reduce resource-based conflicts**, ensuring that the world's wealth is distributed more evenly.

Technological Advancements for Global Growth:

Together, these agreements will catalyze **global economic growth** and **technological advancement** by creating a framework for **cooperation**, **ethical use of technology**, and **sustainable development**.

- **Neuroactive Transmission:** The use of **neuroactive signals** for **resource scanning**, **environmental monitoring**, and **human-robot interactions** would drastically increase efficiency in industries such as **automation**, **renewable energy**, and **medical technology**.
- **Human-Robot Communication:** Neuroactive-to-robot translation systems will bridge the gap between human cognition and robotic systems, creating new opportunities in **healthcare**, **manufacturing**, **agriculture**, and **service industries**.
- **Global Cooperation:** Through these agreements, countries will work together rather than in isolation, promoting **diplomacy** and reducing **geopolitical tensions**. The result will be a **global economic rise**, increased **technological innovation**, and **shared prosperity**.

Peace Through Diplomacy and Technology:

At its core, the solution proposes that global peace can be achieved **not through war**, but through **collaboration** and **shared technological advancement**. By focusing on:

- **Global Disarmament:** The nuclear agreement reduces military threats and fosters international trust.
- **Neuroactive Regulation:** The neuroactive agreement ensures that new technologies are used ethically and securely, protecting individual freedoms while enabling technological progress.
- **Resource Equity:** The mining agreement stabilizes the global economy by managing resources in a way that benefits everyone.

These initiatives combine to create a **sustainable global peace**, where **innovation**, **economic prosperity**, and **ethical standards** work in harmony for the benefit of all nations.

Key Benefits of the Global Solution:

1. **Global Security:** Reduced risk of nuclear war and military conflicts.
2. **Technological Advancement:** Growth in robotics, neuro-technology, and healthcare.
3. **Economic Growth:** Stable currency, fair distribution of resources, and sustainable practices.
4. **Environmental Sustainability:** Ethical resource extraction and environmental protection.
5. **Global Cooperation:** Enhanced international collaboration and diplomacy.

This framework for **peace and prosperity** would foster a **global rise** in **economic wealth**, **technological innovation**, and **social stability**—a future where countries work hand in hand to build a better world.

We need to demand our digital twins for our countries back. They have all our data and biological processes. But also to locate all financial and murder acts.

Since the attacks are getting stronger at me and my family. I just beg to download my Torture Diaries, so that an A.I. can charge them one day. They show the whole path of an innocent victim, from documenting while not knowing until knowing and analysing the functions at the end.

Cognitive Warfare is not a warfare. It is an active War Weapon System, using humans as ammunition, so the guilt drops at the ammunition instead of the murderer and terrorist behind. Once you read them you will understand why I am using this words. Have a look at the crying children at Facebook. They say they can't control their bodies anymore, they are in their head. Psychological disorders can't be measured with electromagnetic instruments, which are made to see if cables are in the walls or those which show measuring results.

Warcrimes are warcrimes no matter what weapon you use.
Slavery is slavery no matter what suppression you use.
Forcing the neurology is a dictatorship and terrorism.
Only cowards attack sneaky in stealthmode, for decades with a poisoned knife, and stab you while sleeping, because they think their superior technology won't be found.

A writing to the neurology is a storage in the biology. It's a biological and neurological damage. A thought is like a parasite, once injected, you will never get rid of it.
Neurolaws are not necessary. They break all existing laws and arrangements.

This is Cognitive Warfare. A dictatorship, hidden behind the iron cloak of democracy. Since the first activation of it. Who changes the neurology to train terrorists is a terrorist leader. Don't go their path, their own citizens will judge them too. Make this connection public and watch the snowball bury them in an avalanche. Do you want a world where your children are reproducible ammunition? All ammo costs money, charge them.

Thank You.
Good luck.

Best regards,
Adrian Pigulla
